Community and Family Studies

Stage 6

Syllabus

PLEASE NOTE
The assessment and HSC examination requirements detailed in this syllabus refer to the 2009 HSC. New Assessment and Reporting information will apply to this syllabus for the 2010 HSC and beyond.

1 The Higher School Certificate Program of Study

The purpose of the Higher School Certificate program of study is to:

• provide a curriculum structure which encourages students to complete secondary education;

• foster the intellectual, social and moral development of students, in particular developing their:
  – knowledge, skills, understanding and attitudes in the fields of study they choose
  – capacity to manage their own learning
  – desire to continue learning in formal or informal settings after school
  – capacity to work together with others
  – respect for the cultural diversity of Australian society;

• provide a flexible structure within which students can prepare for:
  – further education and training
  – employment
  – full and active participation as citizens;

• provide formal assessment and certification of students’ achievements;

• provide a context within which schools also have the opportunity to foster students’ physical and spiritual development.
2 Rationale for Community and Family Studies in the Stage 6 Curriculum

Contemporary society is characterised by rapid social and technological change, cultural diversity, conflicting values and competitive pressures. Developing understanding about society and living in society requires a comprehensive knowledge of its complex nature. Consequently, Community and Family Studies is an interdisciplinary course drawing upon selected components of family studies, sociology, developmental psychology and students’ general life experiences. This course focuses on skills in resource management that enable people to function effectively in their everyday lives, in families and communities.

As students develop into young adults they are faced by challenges of increasing complexity and there is a range of strong influences on the decisions they make. Schools complement the role of families and other social groups by helping students to make informed decisions and to take responsible action in all aspects of their lives. This includes preparing students for vocational options and acting to enhance the wellbeing of themselves and others. To this end, Community and Family Studies develops students’ knowledge, skills and attitudes relevant to effective decision-making leading to confidence and competence in solving practical problems in the management of everyday living.

The way in which individuals relate to others is a key factor determining their capacity to lead responsible and productive lives both now and in the future. Community and Family Studies provides opportunities for students to explore and form positive attitudes about themselves and others; to develop an understanding of their relationships within their families and other groups; to learn to work cooperatively and to appreciate the importance of effective communication.

Community and Family Studies utilises an ecological framework to investigate the interactions among the individual, family, community and society. Recognition of the interdependence of the individual and other groups is central to the framework. Consequently, this syllabus focuses the Preliminary course on the individual and their interactions with personal groups, family and community. The HSC course builds upon this by examining how the wellbeing of individuals, families and communities are affected by broader societal influences including sociocultural, economic and political factors.

Community and Family Studies can have a direct and positive influence on the quality of students’ lives both now and in the future. During the school years, students are confronted with an awareness of their emerging identity as young women and young men. Community and Family Studies investigates the unique contributions of individuals, groups, families and communities in the development of effective social structures. It encourages opportunities for students to become proactive members of society as they examine both their potential to adopt a range of roles and the responsibilities they have in contributing to society.
The dynamic nature of this area of study places particular importance on the skills of inquiry and investigation. Research is an integral component of this subject. Students are required to develop and utilise research skills in planning, collecting, recording, interpreting, analysing and presenting as they employ various research methodologies to complete an Independent Research Project (IRP).

Community and Family Studies explores life issues that are important to all young people and of equal relevance to female and male students. The topics investigated and the emphasis on research ensures a course that is attractive to many students, with the capacity to challenge and extend all students’ ability levels.
3 Continuum of Learning for Community and Family Studies Stage 6 Students

Stages 1–3
PDHPE K–6

Stages 4–5
PDHPE 7–10

Stage 6
Community and Family Studies Preliminary and HSC Courses

Workplace TAFE University Other
4 Aim

Community and Family Studies Stage 6 aims to develop in each student an ability to manage resources and take action to support the needs of individuals, groups, families and communities in Australian society.

5 Objectives

Students will develop:
1. knowledge and understanding about resource management and its role in ensuring individual, group, family and community wellbeing
2. knowledge and understanding about the contribution positive relationships make to individual, group, family and community wellbeing
3. knowledge and understanding about the influence of a range of societal factors on individuals and the nature of groups, families and communities
4. knowledge and understanding about research methodology and skills in researching, analysing and communicating
5. skills in the application of management processes to meet the needs of individuals, groups, families and communities
6. skills in critical thinking and the ability to take responsible action to promote wellbeing
7. an appreciation of the diversity and interdependence of individuals, groups, families and communities.
# 6 Course Structure

The Community and Family Studies Stage 6 Syllabus includes two 120 hour courses. The Preliminary course consists of three mandatory modules. The HSC course consists of three core modules representing 75 percent of course time. An options component representing 25 percent of course time includes three modules of which students are to study only one.

7.2 Key Competencies

Community and Family Studies provides a context within which to develop general competencies essential for the acquisition of skills that will enable students to contribute effectively to their community. Key competencies are embedded in the Community and Family Studies Stage 6 Syllabus to enhance student learning.

The emphasis on resource management and research methodologies underpins the content and learning experiences within Community and Family Studies. Collecting, analysing and organising information provides the process by which students will conduct research. The subject also requires students to consider relevant information from a variety of sources prior to proposing management solutions in family and community contexts.

Conducting research also focuses on the processes of: recognising purpose and audience; selecting appropriate form and style; conveying meaning clearly, concisely and coherently; and revising and correcting as required. These have all been identified as essential skills in effective communication.

Planning and organising activities receives explicit focus as they are integral to teaching and learning in Community and Family Studies. This focus is covered in the Preliminary module — Individuals and Groups, the HSC module — Groups in Context and the HSC option module — Individuals and Work.

The syllabus provides opportunities for students to work both independently and as members of groups to conduct investigations and propose management solutions in family and community contexts. In this way the chance to develop the competency of working with others and in teams is provided.

When students analyse statistical evidence or present data in chart or graph form they are using mathematical ideas and techniques. In Community and Family Studies students are required to analyse and interpret data before proposing solutions to problems or recommending strategies for future directions.

Solving problems is particularly relevant in Community and Family Studies. Students are required to critically analyse practical life situations and propose thoughtful and creative solutions to these real life situations. Economic, social, ethical and other factors are considered when making decisions about the allocation of limited human and non-human resources. Similar problem solving is required when prioritising individual, group, family and community needs.

In Community and Family Studies, students investigate life issues. The source of their data in contemporary society may be either traditional or electronic. In the option module — Social Impact of Technology, students are required to conduct a case study of one piece of technology with emphasis on the impact and role technology has in contemporary society. This should involve them using the technology they are investigating.
8 Content: Community and Family Studies Stage 6 Preliminary Course

8.1 Preliminary Core: Resource Management

This module should occupy approximately 20 percent of total course time.

This module emphasises the fundamental importance of the skill of resource management in the satisfaction of an individual’s needs. The concepts of wellbeing, needs and wants, resources, values and standards, goal setting, communication, decision-making and management processes explored in this module form the basis of study throughout the course.

Students investigate interpersonal relationships and wellbeing throughout the lifespan and their contribution to personal growth and empowerment to function effectively in a range of lifestyle settings.

Students apply the knowledge, understanding and skills developed in this module, to practical situations in a variety of personal, family and community contexts.

This module provides introductory research experience in the design and conduct of an interview.

Module Focus

- Basic concepts of resource management
- Communication
- Decision-making
- Management processes

Outcomes

A student:

- P1.1 describes the contribution an individual’s experiences, values, attitudes and beliefs make to the development of goals
- P1.2 proposes effective solutions to resource problems
- P3.2 analyses the significance of gender in defining roles and relationships
- P4.1 utilises research methodology appropriate to the study of social issues
- P4.2 presents information in written, oral and graphic form
- P5.1 applies management processes to maximise the efficient use of resources
- P6.1 distinguishes those actions that enhance wellbeing.
### Students learn about:

**basic concepts of resource management**

#### Teacher note: The concepts of needs, wants, values, goals, communication and decision-making are included in the Years 7–10 PDHPE Syllabus. The concepts should be reinforced and further developed at this stage to reflect students’ level of experience and maturity.

### Students learn about:

- **values and standards**
  - interrelationship of values and standards
  - personal nature of values
  - potential for conflicting values

- **goals**
  - classification of goals
    - short-term, intermediate, long-term
  - individual and group
  - community and global

- **communication**
  - **types of communication**
    - verbal and non-verbal
    - assertive, aggressive, passive
  - **achieving effective communication**
    - characteristics of effective communication
    - characteristics of ineffective communication
    - barriers to communication
    - managing barriers to communication
  - **communication in relationships**
    - levels of communication
    - disclosure, trust and bonding
    - interpersonal communication
    - building and maintaining relationships through communication

- **interviews as a research method**
  - structured and unstructured
  - advantages and disadvantages
  - constructing, conducting, recording responses
  - presenting results

### Students learn to:

- analyse how femininity and masculinity shape values and standards
- decode media messages, conversations, community practices, policies and rules to determine the values embedded within them
- prepare strategic plans that incorporate short, intermediate and long-term goals that are realistic and achievable
- analyse their own verbal and non-verbal communication and suggest ways in which they can improve their skills
- examine how their ideas about being female or male influence their attempts to communicate effectively
- identify and employ technologies as a method of communication
- analyse the effectiveness of relationships in terms of the level of disclosure, trust and bonding evident
- evaluate the level of interpersonal skill demonstrated by different individuals and groups. Explain why there is variance in interpersonal skill from person to person and group to group
- select and utilise effective verbal and non-verbal communication skills by conducting a simple interview
- use computer applications to present responses to an interview
Students learn about: | Students learn to:
---|---
decision-making as a process  
• stages/steps  
  – analysing the problem  
  – investigating the alternatives and their consequences  
  – choosing and implementing an alternative  
  – evaluating the outcome  
• simple and complex problems  
decision-making styles  
• impulsive  
• intuitive  
• hesitant  
• confident  
• rational  
factors influencing decision-making  
• access to resources  
• complexity of the problem  
• past experiences and personal values  
• attitudes to change  
responsibility for decisions  
• individual  
• group  
• community  
management processes  
management models  
• planning, organising, implementing and evaluating  
• plan, do, check, act  
• total quality management  
applying management skills in different contexts  
• individual  
• peers  
• family  
• school  
• work  
• community  

• apply the decision-making process to a range of contemporary and personal practical problems and analyse the decision in terms of:  
  – the style(s) employed  
  – the resources used  
  – complexity  
  – effectiveness  
• explore the impact of gendered expectations on decision-making  
• identify the style they employed in making a recent significant decision, eg selecting subjects for senior school  
• assess how each factor contributes to the decisions people make  
• analyse the degree to which sociocultural background influences one’s autonomy in decision-making  
• analyse how decision-making may vary as the focus shifts from a personal level to community level  
• compare and contrast management processes and their applications in practical settings  
• examine the relationship between effective decision-making and good management  
• apply management skills to design strategies for life situations, eg seeking employment, study habits  
• analyse how effective management leads to positive interpersonal relationships in different contexts
Suggested Assessment Strategies

Critically analyse a survey, an interview or report from a newspaper and comment on how effectively it communicates its meaning.

Plan a study timetable that highlights short-term, intermediate and long-term goals.

Write an essay supporting or opposing a decision made by an individual or group that has appeared in a local newspaper.
8.2 Preliminary Core: Individuals and Groups

This module should occupy approximately 40 percent of total course time.

Positive interpersonal relationships among individuals, family and social groups enhance an individual’s sense of belonging. Further, positive relationships contribute to an environment where goal achievement is enhanced and the wellbeing of individuals and groups are promoted. The management of conflict is consequently an essential interpersonal skill.

Groups play an important role in meeting individual, family and community needs. This Preliminary module provides students with the opportunity to examine the effectiveness of various groups in meeting these needs. Students explore factors such as the type of group, its purpose and goals, as well as the relationships, interaction patterns and power structures within the group. They also examine the nature of leadership and explore its significance as a determinant of group effectiveness.

This module provides opportunity for introductory research experience including conducting case studies and the use of sociometric observation.

Module Focus
• The individual
• Group formation
• Roles, relationships and tasks within groups
• Leadership
• Group dynamics
• Managing conflict
• Individual and group wellbeing

Outcomes

A student:
P1.2 proposes effective solutions to resource problems
P2.1 accounts for the roles and relationships that individuals adopt within groups
P2.3 examines the role of leadership and group dynamics in contributing to positive interpersonal relationships and achievement
P3.2 analyses the significance of gender in defining roles and relationships
P4.1 utilises research methodology appropriate to the study of social issues
P4.2 presents information in written, oral and graphic form
P6.2 uses critical thinking skills to enhance decision-making.
Students learn about:

</table>
Suggested Assessment Strategies

Prepare a report on a recognised leader identifying:
• the leadership style(s) employed
• effectiveness of the leadership
• the individual’s pathway to leadership.

Using media reports, collect and present data about a conflict between two groups.

Analyse the types of roles played within groups in terms of their behaviour and their positive and negative contributions to groups. Present your findings in tabular form.
8.3 Preliminary Core: Families and Communities

This module should occupy approximately 40 percent of total course time

This module provides students with an insight to the many forms of families in modern society in order to determine the contemporary role of the family. The module requires students to examine how constant change challenges families to utilise management skills for personal and family wellbeing and acknowledges the interdependence of families and communities.

The module recognises socialisation as a life long process. Students investigate physical and social influences on child development as well as changing perceptions of femininity and masculinity.

This module presents students with a range of introductory research experiences such as conducting a literature review, analysing quantitative data, conducting a case study and designing and administering a questionnaire.

Module Focus

- Lifespan development
- Socialisation of children
- Family structures and functions
- Change in families
- Change in communities
- Support networks

Outcomes

A student:
P1.1 describes the contribution an individual’s experiences, values, attitudes and beliefs make to the development of goals
P1.2 proposes effective solutions to resource problems
P2.2 describes the role of the family and other groups in the socialisation of individuals
P2.4 analyses the interrelationship between internal and external factors and their impact on family functioning
P3.1 explains the changing nature of families and communities in contemporary society
P3.2 analyses the significance of gender in defining roles and relationships
P4.1 utilises research methodology appropriate to the study of social issues
P4.2 presents information in written, oral and graphic form
P6.1 distinguishes those actions that enhance wellbeing.

<tbody>
<tr>
<td><strong>change in families</strong></td>
<td><strong>models</strong></td>
</tr>
</tbody>
</table>
| Teacher note: Students are not required to gain a detailed understanding of the intricacies of the FAAR model. The intent is for students to examine how the model supports the family life cycle in responding to unplanned change. | • family life cycle  
  – beginning  
  – expanding  
  – contracting  
• Family Adaptation and Adjustment Response (FAAR)  |
| **nature of change** | • assess the appropriateness of both models in the context of modern society  |
| • internal and external  
• planned and unplanned  
• temporary and permanent  
• impact on traditional roles | • examine how change challenges individuals and families to utilise management skills by analysing their own experiences of change  
• use a case study to research the impacts (both positive and negative) of a major change that has occurred within their own family  |
| **change in communities** | **communities** |
| exploring the emergence of communities  
• geographic reasons  
• interest-based  
• other  
• contribution of different groups to communities, eg family | • analyse ways that communities can meet the needs of people from local to global level, eg education, health  |
| levels of community organisation  
• local  
• state  
• national  
• global |  |
Students learn about:

decision-making in communities
  • processes
    – arbitration
    – consensus
    – election/voting
    – referendum
  • role of individual, small groups and large groups
  • influences on decision-making
    – legislative
    – environmental
    – lobbying

changing nature of communities
  • causes of change
    – work and employment patterns
    – trauma/crisis
    – demographics
  • impacts of change (positive and negative)

support networks
  • formal
  • informal
  • access and availability for different families

questionnaire as a research method
  • constructing and conducting
  • advantages and disadvantages

Students learn to:

• explore the processes employed to make decisions in the community, eg local council meeting, resident management groups, tribunal, lobbying
• examine a local community decision by identifying the roles of individuals and groups, the factors influencing the decision-making process, the methods employed to make the decisions and the outcomes of the decision
• analyse a community that has experienced change and assess the impact of change on that community
• identify some of the support networks and the degree of access and availability for different families in their community
• use a questionnaire method of research to investigate the support networks that are utilised by families in your local community

Suggested Assessment Strategies

Compare and contrast the ways in which nuclear and blended family structures perform their functions.

Investigate a local community organisation to determine how decisions are made within the organisation.

Prepare a written or oral presentation on a local formal support network focusing on access and availability.
9  Content: Community and Family Studies Stage 6 HSC Course

9.1  HSC Core: Research Methodology

This module should occupy approximately 25 percent of total course time. It is an integral part of the development of the Independent Research Project.

This module builds upon introductory research opportunities integrated throughout the Preliminary course. It focuses on the processes of inquiry and research, allowing students to pursue an area of interest in an Independent Research Project. The skills and understanding related to research methodology should be developed throughout the study of both the Preliminary and HSC courses.

Module Focus
•  Research methodology

Outcomes

A student:
H4.1 justifies and applies appropriate research methodologies
H4.2 communicates ideas, debates issues and justifies opinions.
Students learn about: | Students learn to:  
---|---
**research methodology**

**Teacher note:** It is expected that students will have some understanding of research methodology as a result of applications throughout the Preliminary course. During this module these understandings will be further developed in order for students to complete an Independent Research Project. Detail of the requirements of the Independent Research Project can be found in Section 10 on page 53.

**methodologies**
- quantitative and qualitative

**conducting research**
- formulating a research proposal
- research methodology
  - survey, using interview (structured, unstructured), questionnaire (oral, written)
  - case study
  - observation
  - literature review
- planning
- collecting and recording data
- analysing and interpreting data

**presenting data**
- graphs, tables, presenting key data
- report writing and presentation
- bibliography
- appendix

**sources of data**
- people/individuals
- organisations/groups
- electronic sources
- libraries
- print sources

**research terminology**
- bias
- hypothesis/question
- reliability
- sampling
- validity

- conduct research by:
  - developing a suitable question
  - selecting appropriate research methodology for specific research settings
  - taking into account issues of bias and sampling
  - preparing a plan of how and when resources will be used
  - collecting and recording from primary and secondary sources of data
  - analysing and interpreting data collected for research purposes
  - crediting sources of data by means of bibliography and appendix
  - following ethical procedures in their research
  - including an account of positive and negative experiences

- examine the limitation of data and its use to support particular views

- explore the relationship between sampling and reliable research outcomes
Students learn about: | Students learn to:
---|---
*ethics in research*
• privacy
• respect for subjects of research
• integrity of researcher
• integrity of data
• HSC regulations

**Suggested Assessment Strategies**

Formulate a research question about adolescent employment.

Analyse examples of graphical information used to communicate research findings.

Develop a set of guidelines outlining ethical procedures for student researchers.
9.2 HSC Core: Groups in Context

This module should occupy approximately 25 percent of total course time.

Economic, political, geographical and social conditions may contribute to inequities across groups within a community. For these groups, defining needs, creating opportunities for access to resources and skill in resource management increases their potential to achieve wellbeing.

This module builds upon study of the role groups play in meeting individual, family and community needs introduced in the Preliminary course module — Individuals and Groups. In this module, the focus of students’ investigation is on the needs of individuals in specific groups and their access to resources to satisfy these needs.

Module Focus
• Identifying groups with specific needs
• Identifying the needs of specific groups in the community
• Researching community groups

Outcomes
A student:
H1.1 analyses the effect of resource management on the wellbeing of individuals, groups, families and communities
H2.2 evaluates strategies to contribute to positive relationships and the wellbeing of individuals, groups, families and communities
H2.3 critically examines how individual rights and responsibilities in various environments contribute to wellbeing
H3.1 analyses the sociocultural factors that lead to special needs of individuals in groups
H3.3 critically analyses the role of policy and community structures in supporting diversity
H4.1 justifies and applies appropriate research methodologies
H4.2 communicates ideas, debates issues and justifies opinions
H5.1 proposes management strategies to enable individuals and groups to satisfy their specific needs and to ensure equitable access to resources
H6.2 formulates strategic plans that preserve rights, promote responsibilities and establish roles leading to the creation of positive social environments.
<table>
<thead>
<tr>

<th>Students learn to:</th>
</tr>
</thead>
<tbody>
<tr>
<td>identifying groups with specific needs</td>
<td>identify special characteristics of each group in order to justify why each should be considered a unique entity</td>
</tr>
</tbody>
</table>

**Teacher note:** In this section students are required to gain a general understanding of the characteristics and needs of members of each of the groups. Detailed study of three groups is outlined in the next section of this module.

- aged
- chronically ill
- cultural groups, eg Aboriginal and Torres Strait Islander
- families in crisis
- disabled
- gay and lesbian
- rural families
- sole parents
- socioeconomically disadvantaged
- the homeless
- youth

**identifying the needs of specific groups in the community**

- access to services
- education
- employment
- financial support
- health
- housing
- security and safety
- self-esteem
- sense of identify

**factors affecting access to resources**

- age
- disability
- education
- ethnicity/culture
- gender
- location
- socioeconomic status

- classify specific needs and prioritise the significance of each to different groups

- analyse the effect of access to resources on the wellbeing of groups identified. Consider the extent to which this issue may be compounded for individuals who are affected by a number of factors, eg a rural family experiencing financial hardship
### Students learn about:

**researching community groups**

| Teacher note: In this section students are required to conduct a detailed investigation of three community groups. The areas of study are a guide and may not be equally relevant to each group identified. For example, issues such as conflict between group and community interests may not be applicable to particular groups but this should emerge as a finding of student inquiry. |

<tr>
<td>- think critically about equity issues faced by groups and formulate management strategies to address them</td>
</tr>
</tbody>
</table>

### Suggested Assessment Strategies

Debate the extent of access an individual may have to community resources.

Compare and contrast the needs of two groups you have studied.
9.3 HSC Core: Parenting and Caring

This module should occupy approximately 25 percent of total course time.

This module is concerned with the issues faced by mothers, fathers, siblings and other carers as they effectively manage resources and promote positive interpersonal relationships between family members or with the person for whom they care.

Students are required to critically analyse the role of parents and carers in optimising individual and family wellbeing by considering the factors that influence relationships and how parents and carers are supported in their roles.

Module Focus
• Becoming parents and carers
• Managing parenting and caring responsibilities
• Parenting and caring relationships
• Support for parents and carers

Outcomes

A student:
H1.1 analyses the effect of resource management on the wellbeing of individuals, groups, families and communities
H2.1 analyses different approaches to parenting and caring relationships
H2.2 evaluates strategies to contribute to positive relationships and the wellbeing of individuals, groups, families and communities
H2.3 critically examines how individual rights and responsibilities in various environments contribute to wellbeing
H3.2 evaluates networks available to individuals, groups and families within communities
H3.4 critically evaluates the impact of social, legal and technological change on individuals, groups, families and communities
H5.1 proposes management strategies to enable individuals and groups to satisfy their specific needs and to ensure equitable access to resources
H5.2 develops strategies for managing multiple roles and demands of family, work and other environments
H6.1 analyses how the empowerment of women and men influences the way they function within society.
Students learn about: | Students learn to:
--- | ---
**becoming parents and carers**

*biological parents*
- pregnancy
  - planned
  - unplanned
- IVF and GIFT

*social parents*
- adoption
- fostering
- step-parenting
- surrogacy

*carer relationships*
- voluntary
- paid

**managing parenting and caring responsibilities**

*preparations for becoming a parent or carer*
- physical — prenatal considerations for parent and child health
- social changes parents and carers may have to make
- emotional preparations for the new relationships
- economic

*factors influencing resource management in the caring relationship*
- dependents affected by the caring relationship
  - age
  - skills
  - capabilities
  - special needs
- resources
  - time
  - energy
  - finances
  - housing
- access to services

- examine what it means to be a parent, either biological or social, for both females and males
- examine the legal and social implications of birth technologies and social parenting
- discuss the variety of circumstances that might lead to an individual requiring care and assess the implications for planned and unplanned circumstances
- investigate the significance of gender in carer relationships
- examine current and future areas for development necessary as a consequence of becoming a parent or carer
- examine how effective resource management impacts on parenting and caring and propose strategies for parents and carers in different situations
Community and Family Studies Stage 6 Syllabus
The assessment and HSC examination requirements detailed in this syllabus apply to the 2009 HSC.
New Assessment and Reporting information will apply to this syllabus for the 2010 HSC and beyond.

</tbody>
</table>

- age
- culture and religion
- education
- gender
- previous experiences/own upbringing
- socioeconomic status
- media
- nature of relationship
- style of parenting
  - authoritarian
  - democratic
  - permissive/indulgent
  - negligent
- special needs
  - illness
  - disability
Students learn about:

- multiple role expectations as a result of commitments to:
  - family
  - work
  - sport/leisure
  - other

**rights and responsibilities in parenting and caring**

- rights
  - parents and carers
  - children
  - other persons in care
- responsibilities
  - parents and carers (duty of care, setting limits, discipline)
  - children (towards parents and other family members)
- sources of conflict between parents and children, carers and cared for

**support for parents and carers**

Students learn to:

- examine a number of case studies to determine how parents and carers manage their multiple roles. Propose strategies to assist parents and carers with this management

- analyse the rights and responsibilities of parents, carers, children and other persons in care to determine areas where tension or conflict might exist
- investigate the implications of cultural and gender differences in setting limits
- recognise the differences that may exist between the rights and responsibilities of parents and those of carers in different situations

**Teacher note:** Students need a general understanding of each support group, agency or service available for parents and carers. They are then required to investigate one service in detail.

- health services
- welfare agencies
- parenting groups
- community groups
- government agencies
- childcare services
- carers’ support groups

- investigate a support service available for parents and carers in the local community. This study should identify:
  - the target group for the service
  - how the service is accessed
  - the cost of accessing the service
  - the source of funding

**Suggested Assessment Strategies**

Survey peers to learn about the parenting and caring responsibilities they have towards their mothers, fathers, brothers and sisters.

Review articles representing different theories of parenting style to determine the strengths of each style.

Prepare an information pamphlet about a formal support service for parents or carers in the local community.
9.4 HSC Option: Family and Societal Interactions

This module should occupy approximately 25 percent of total course time.

Changes in legal and social systems affect individuals in their family life. This module requires an understanding of the ecological model and the interactions and supports provided. Students will examine how government and community structures support and protect family members at all stages of the lifespan. This module draws attention to significant legislation and highlights the role of these laws in assisting families to function effectively.

Module Focus
• Supporting and protecting individuals and families
• Protecting children
• Assisting young people to become young adults
• Being a responsible adult family member
• Acknowledging and supporting the aged

Outcomes
A student:
H2.3 critically examines how individual rights and responsibilities in various environments contribute to wellbeing
H3.2 evaluates networks available to individuals, groups and families within communities
H3.3 critically analyses the role of policy and community structures in supporting diversity
H3.4 critically evaluates the impact of social, legal and technological change on individuals, groups, families and communities
H6.1 analyses how the empowerment of women and men influences the way they function within society
H6.2 formulates strategic plans that preserve rights, promote responsibilities and establish roles leading to the creation of positive social environments.
## Students learn about:

**supporting and protecting individuals and families**

*role of legislation*
- to set guidelines for socially acceptable behaviour
- to provide processes to settle disputes peacefully
- to provide mechanisms to enable change to legislation in order to address social attitudes
- to protect members of society
- to promote a just society

## Students learn to:

- assess the degree to which legislation supports and protects individuals and families in contemporary society

### Teacher note:
When dealing with the legislative role of the government in this module it is not necessary to cover every law. Laws should be addressed from the perspective of how they assist and support the rights of individuals or groups as community members. The responsibilities associated with these pieces of legislation should also be considered. It is important for teachers to check changes to legislation and address these appropriately. Community support networks and services should be dealt with in a similar way.

## Students learn about:

**protecting children**

*the government’s role*
- legislation
  - Child Support (Assessment) Act, 1989 (Cth)
  - Children (Care and Protection) Act, 1987 (NSW)
  - Minors (Property and Contracts) Act, 1970 (NSW)
  - Family Provision Act, 1982 (NSW)
- agencies that implement these laws

*the community’s role in providing for the wellbeing of children*
- children’s services
- schools
- leisure activities
- refuges
- support groups, eg safe houses, after school care

## Students learn to:

- examine the evolution of child-related laws and consider the effectiveness of the legislation in protecting the welfare of children
- investigate the provisions made by their local community to protect the welfare of children
Students learn about:

**assisting young people to become young adults**

*the government’s role in regulating rights*
- licencing drivers
- school attendance
- access to tobacco and alcohol
- gambling regulations
- right to vote
- legal age for sexual relationships and marriage
- gaining other entitlements, eg passport
- protecting children in the workplace
- adolescent responsibilities in assuming these rights

*the community’s contribution*
- health care access
- leisure and recreation
- support groups, eg youth councils, Police Citizens Youth Club

**being a responsible adult family member**

*government’s role in supporting adults and families*
- Commonwealth legislation
  - Family Law Act, 1975 (Cth)
  - Family Law Reform Act, 1995 (Cth)
  - Marriage Act, 1961 (Cth)
- State legislation
  - Adoption of Children Act, 1965 (NSW)
  - Artificial Conception Act, 1984 (NSW)
  - Crimes (Domestic Violence) Amendment Act, 1982 (NSW)
  - De facto Relationship Act, 1984 (NSW)
- government departments and support agencies: Commonwealth, State and other

Students learn to:

- debate the age appropriateness of the rights afforded to young people through the law. Consider questions such as:
  - Are all 17 year olds responsible enough to drive safely?
- survey parents and peers to determine their opinion about what constitutes adolescent rites of passage
- analyse both legislation and cultural factors to determine differences between the ways in which females and males are recognised as adults
- debate the effectiveness of government support structures and agencies in administering the laws supporting adults and family members
- research community programs that focus on violence-related issues and analyse the success of these programs
### Students learn about:

**community support for adults and families**
- counselling for individuals and families
- health services
- women’s refuges
- support groups, eg Neighbourhood Watch, Alcoholics Anonymous, family respite

**acknowledging and supporting the aged**

**government entitlements and support**
- legislation
  - Aged Care Act, 1997 (Cth)
  - Anti-Discrimination Act, 1977 (Cth)
- entitlements
  - aged pension
  - health care assistance
  - travel and other concessions, eg seniors card
  - rebates
  - superannuation provisions
  - retiring age recognition
- government departments and support agencies that provide support: Commonwealth, State and others

**community support for the aged**
- access to health care
- housing alternatives
  - retirement villages
  - nursing homes
  - hostels
  - remaining in own home with support, eg Home Care, Meals on Wheels
- support groups, eg Senior Citizens and other clubs, mentoring programs

### Students learn to:

- investigate a community support group that enhances a family’s ability to function

- evaluate the effectiveness of Australian law in contributing to the wellbeing of the aged
- examine how entitlements for the aged contribute to their ability to plan for their retirement

- predict issues relevant to the aged today that may shape future government policy
- propose strategies designed to recognise and utilise the aged as a valuable community resource
Suggested Assessment Strategies

Evaluate child-related laws in Australia/NSW by outlining:
• the laws that currently exist
• the reasons why these laws were developed
• how effectively these laws protect the welfare of children.

Debate the statement ‘families should take responsibility for aging relatives’.

Select one of the laws relating to families and review the issues relating to that law.

Interview an elderly person to identify how the government and the community assist in satisfying their needs.
9.5 HSC Option: Social Impact of Technology

This module should occupy approximately 25 percent of total course time.

Technology plays an important role in redefining society generally and specifically families, communities and the workplace. While technology is welcomed and accessed by some groups, many inequities exist.

In this module, students examine perceptions of technology and investigate historical and international influences on the evolution of technology. Using this fundamental knowledge, students consider the potential benefit of technological developments while investigating the inequities of access experienced by some groups.

Module Focus

• Defining technology
• Reasons for the development of technology
• Technology and wellbeing
• The impact of technology on lifestyle
• Issues related to technological development
• Investigating technology

Outcomes

A student:

H2.3 critically examines how individual rights and responsibilities in various environments contribute to wellbeing

H3.4 critically evaluates the impact of social, legal and technological change on individuals, groups, families and communities

H4.1 justifies and applies appropriate research methodologies

H4.2 communicates ideas, debates issues and justifies opinions

H6.1 analyses how the empowerment of women and men influences the way they function within society.
### Students learn about: defining technology

**Teacher note:** The section that details defining technology should be dealt with in broad terms only. The intent is for students to gain an understanding of technological advancements prior to considering the impact of these on individuals, families and communities.

### definitions
- UNESCO, 1985
- technology as applied practical knowledge
- technology as hardware, eg appliances, gadgets, toys
- technology as organisation of knowledge, eg communications, media, internet, home entertainment
- others

### historical perspectives
- brief overview of the Industrial Revolution leading towards technological development

### reasons for the development of technology
- improve upon existing technology
- economic benefit
- competition with existing technology
- social betterment
- emergence of a global community
- response to social problems, eg health
- others

### technology and wellbeing
- technical wellbeing, eg ability to control the environment
- practical wellbeing, eg understanding and communicating in the world we know
- emancipatory wellbeing, eg ability to participate effectively in a variety of situations

### Students learn to:

- identify both primitive and complex technologies and construct their own definitions that encompass the scope of technology

- outline how the technological age has evolved

- select various forms of technology and analyse the context in which they emerged

- examine the contribution technology makes towards meeting individual wellbeing
Students learn about:

* factors affecting access to and acceptance of technology
  - age
  - culture
  - education
  - economic
  - geographical
  - gender
  - others

* the impact of technology on lifestyle
  * technologies and the family
    - reproductive technology
    - genetic engineering
    - household technologies
    - computer and communications technologies
  * technologies and communities
    - building technologies
    - communications
    - consumer services
    - entertainment
    - finance
    - food
    - health and medicine
    - knowledge
    - leisure
    - transport/travel
  * technologies and work
    - job definition
    - structure of the workplace
    - job satisfaction
    - efficiency
    - employment and unemployment
    - training and education
    - introduction of technology into the workplace

Students learn to:

* explain the reasons why availability and acceptance of technology varies

* think critically about the impact of selected technologies on interpersonal relationships in families

* predict how technology will impact on community life in the future

* examine the positive and negative effects technology has had with regard to paid and unpaid work, redefining work, the workplace structure, attitudes towards work and implications for career pathways

* evaluate the role and responsibilities of employers and employees in adopting technology in the workplace
Students learn about:

issues related to technological development
- ethical, eg human reproduction
- equity, eg access to information
- censorship
- electronic media
- privacy
- computer crime

a technology case study
- conduct a case study of a selected piece of technology

Students learn to:

- conduct an investigation to determine the extent of information available on a selected topic through the Internet or other electronic sources
- investigate current issues related to technology

- the study should identify:
  - historical development
  - impact politically, economically and socially
  - groups using the technology
  - other related technological developments
  - issues related to use and development

Suggested Assessment Strategies

‘Technology has positive and negative effects on the satisfaction of individual needs’. Discuss the statement using examples to illustrate your answer.

Evaluate the extent to which each of the members of your family accepts and accesses different technologies.

Compile a media file with articles and reports about the impact of technology on:
- the family
- work
- communities.
9.6 HSC Option: Individuals and Work

This module should occupy approximately 25 percent of total course time.

Work is a productive activity that occurs in a variety of settings. The nature of work changes over the lifespan, requiring balance with other aspects of an individual’s life. The changing nature of work-related situations requires an understanding of social change, cultural influences, economic policies and political processes that impact on work. Students develop skills necessary to manage these changes.

In this module, students consider how contemporary workplace practices have evolved in response to social changes. Students gain an understanding of both the benefits of a variety of work patterns to family wellbeing and how workplace practices have changed to acknowledge the value of family life.

Module Focus
• The nature of work
• Changing work patterns
• Managing workplace and family roles
• Recognising individuals in their workplace

Outcomes

A student:
H2.2 evaluates strategies to contribute to positive relationships and the wellbeing of individuals, groups, families and communities
H2.3 critically examines how individual rights and responsibilities in various environments contribute to wellbeing
H3.3 critically analyses the role of policy and community structures in supporting diversity
H3.4 critically evaluates the impact of social, legal and technological change on individuals, groups, families and communities
H5.2 develops strategies for managing multiple roles and demands of family, work and other environments
H6.1 analyses how the empowerment of women and men influences the way they function within society
H6.2formulates strategic plans that preserve rights, promote responsibilities and establish roles leading to the creation of positive social environments.
## Students learn about:

### the nature of work
- definitions of work
  - historical
  - contemporary
- paid and unpaid work
- value and status of work

### individual and group needs met through work
- self-esteem
- financial
- social
- education
- status
- lifestyle
- career
- social conscience
- cultural

### changing work patterns

## Students learn to:

- explain the significant influences that have impacted upon how people perceive work
- explore the gendered nature of paid and unpaid work
- compare and contrast the needs that are met through paid and unpaid work

- apply the methodology of surveying to examine how needs are met

### Teacher note:
When examining patterns of work, students are required to consider the implications of each for meeting individual and family needs.

### patterns of work
- full-time
- part-time
- casual
- permanent
- contract
- shiftwork
- voluntary
- self-employment
- job share
- telecommuting
- seasonal
- working from home
- others

- describe each work pattern and evaluate the suitability of each for different individuals
- analyse ABS statistics to determine trends in the Australian workforce
<table>

### Students learn about:

- recognise individuals in their workplace

### Students learn to:

- explain the evolution of rights and responsibilities in the workplace
- analyse how rights and responsibilities are supported by workplace structures and affect
  - the wellbeing of the employer and employee in the workplace
  - efficient work practices

#### Teacher note:

Students are not required to gain a detailed understanding of the content of awards and policies. It is intended that they understand the role of such structures in supporting individuals in their workplace.

<table>

</tr>
</tbody>
</table>

**Suggested Assessment Strategies**

Create a glossary that defines each of the work patterns.

Prepare a written or oral presentation on strategies individuals can employ to manage multiple role expectations.

Select ONE supportive workplace structure and prepare a summary report about it, highlighting:

- what it is
- who it is available to
- why it was introduced.
10 Course Requirements

The Community and Family Studies Stage 6 Syllabus includes a Preliminary course of 120 hours (indicative time) and a HSC course of 120 hours (indicative time).

There is no prerequisite study for the Preliminary course. Completion of the Preliminary course is a prerequisite to the study of the HSC course.

No exclusions apply to the study of Community and Family Studies Stage 6.

As part of the HSC, students are required to complete an Independent Research Project in the context of the HSC core module — Research Methodology. The focus of the Independent Research Project should be related to the course content of one or more of the following areas:

• individuals
• groups
• families
• communities
• resource management.

The Independent Research Project consists of three parts

• the project plan
• the project diary
• the product.

The assessment of the Research Methodology Module including the Independent Research Project contributes 25 percent to the school-based assessment. The weighting for each part should reflect school and Board of Studies' policies, as well as the time and effort afforded to each.

The project plan
• provides an initial summary and outline of the complete research process.

The diary
• is a record of an ongoing process
• records values, attitudes and feelings
• reflects honestly on problems encountered and their solutions
• records conversations, contacts, readings and sources of secondary data
• reflects the proposed timeline.

The product
• is independent: that is, it is the student's own work, based on an area of interest related to the course content
• is research based: meaning that the students should ‘find something out’ or add to their existing knowledge
• should reflect the time and commitment allocated to it in the overall context of the course.
11 Post-school Opportunities

The study of Community and Family Studies Stage 6 provides students with knowledge, understanding and skills that form a valuable foundation for a range of courses at university and other tertiary institutions.

In addition, the study of Community and Family Studies Stage 6 assists students to prepare for employment and full and active participation as citizens. In particular, there are opportunities for students to gain recognition in vocational education and training. Teachers and students should be aware of these opportunities.

Recognition of Student Achievement in Vocational Education and Training (VET)

Wherever appropriate, the skills and knowledge acquired by students in their study of HSC courses should be recognised by industry and training organisations. Recognition of student achievement means that students who have satisfactorily completed HSC courses will not be required to repeat their learning in courses in TAFE NSW or other Registered Training Organisations (RTOs).

Registered Training Organisations, such as TAFE NSW, provide industry training and issue qualifications within the Australian Qualifications Framework (AQF).

The degree of recognition available to students in each subject is based on the similarity of outcomes between HSC courses and industry training packages endorsed within the AQF. Training packages are documents that link an industry’s competency standards to AQF qualifications. More information about industry training packages can be found on the National Training Information Service (NTIS) website (www.ntis.gov.au).

Recognition by TAFE NSW

TAFE NSW conducts courses in a wide range of industry areas, as outlined each year in the TAFE NSW Handbook. Under current arrangements, the recognition available to students of Community and Family Studies in relevant courses conducted by TAFE is described in the HSC / TAFE Credit Transfer Guide. This guide is produced by the Board of Studies and TAFE NSW and is distributed annually to all schools and colleges. Teachers should refer to this guide and be aware of the recognition available to their students through the study of Community and Family Studies Stage 6. This information can be found on the TAFE NSW website (www.tafensw.edu.au/mchoice).

Recognition by other Registered Training Organisations

Students may also negotiate recognition into a training package qualification with another Registered Training Organisation. Each student will need to provide the RTO with evidence of satisfactory achievement in Community and Family Studies Stage 6 so that the degree of recognition available can be determined.
12 Assessment and Reporting

PLEASE NOTE
The assessment and HSC examination requirements detailed in this syllabus refer to the 2009 HSC. New Assessment and Reporting information will apply to this syllabus for the 2010 HSC and beyond.

12.1 Requirements and Advice

The information in this section of the syllabus relates to the Board of Studies’ requirements for assessing and reporting achievement in the Preliminary and HSC courses for the Higher School Certificate.

Assessment is the process of gathering information and making judgements about student achievement for a variety of purposes.

In the Preliminary and HSC courses those purposes include:
- assisting student learning
- evaluating and improving teaching and learning programs
- providing evidence of satisfactory achievement and completion in the Preliminary course
- providing the Higher School Certificate results.

Reporting refers to the Higher School Certificate documents received by students that are used by the Board to report both the internal and external measures of achievement.

NSW Higher School Certificate results will be based on:
- an assessment mark submitted by the school and produced in accordance with the Board’s requirements for the internal assessment program
- an examination mark derived from the HSC external examinations.

Results will be reported using a course report containing a performance scale with bands describing standards of achievement in the course.

The use of both internal assessment and external examinations of student achievement allows measures and observations to be made at several points and in different ways throughout the HSC course. Taken together, the external examinations and internal assessment marks provide a valid and reliable assessment of the achievement of the knowledge, understanding and skills described for each course.

Standards Referencing and the HSC Examination

The Board of Studies will adopt a standards-referenced approach to assessing and reporting student achievement in the Higher School Certificate examination.

The standards in the HSC are:
- the knowledge, skills and understanding expected to be learned by students — the syllabus standards
- the levels of achievement of the knowledge, skills and understanding — the performance standards
Both *syllabus standards* and *performance standards* are based on the aims, objectives, outcomes and content of a course. Together they specify what is to be learned and how well it is to be achieved.

Teacher understanding of standards comes from the set of aims, objectives, outcomes and content in each syllabus together with:

- the performance descriptions that summarise the different levels of performance of the course outcomes
- HSC examination papers and marking guidelines
- samples of students’ achievement on assessment and examination tasks.

### 12.2 Internal Assessment

The internal assessment mark submitted by the school will provide a summation of each student’s achievements measured at points throughout the course. It should reflect the rank order of students and relative differences between students’ achievements.

Internal assessment provides a measure of a student’s achievement based on a wider range of syllabus content and outcomes than may be covered by the external examination alone.

The assessment components, weightings and task requirements to be applied to internal assessment are identified on pp 58–9. They ensure a common focus for internal assessment in the course across schools, while allowing for flexibility in the design of tasks. A variety of tasks should be used to give students the opportunity to demonstrate outcomes in different ways and to improve the validity and reliability of the assessment.

### 12.3 External Examination

In Community and Family Studies Stage 6, the external examination includes a three hour written paper for external marking. The specifications for the examination in Community and Family Studies Stage 6 are on p 60.

The external examination provides a measure of student achievement in a range of syllabus outcomes that can be reliably measured in an examination setting.

The external examination and its marking and reporting will relate to syllabus standards by:

- providing clear links to syllabus outcomes
- enabling students to demonstrate the levels of achievement outlined in the course performance scale
- applying marking guidelines based on established criteria.
12.4 Board Requirements for the Internal Assessment Mark in Board Developed Courses

For each course the Board requires schools to submit an assessment mark for each candidate.

The collection of information for the HSC internal assessment mark must not begin prior to the completion of the Preliminary course.

The Board requires that the assessment tasks used to determine the internal assessment mark must comply with the components, weightings and types of tasks specified in the table on p 61.

Schools are required to develop an internal assessment program that:
• specifies the various assessment tasks and the weightings allocated to each task
• provides a schedule of the tasks designed for the whole course.

The school must also develop and implement procedures to:
• inform students in writing of the assessment requirements for each course before the commencement of the HSC course
• ensure that students are given adequate written notice of the nature and timing of assessment tasks
• provide meaningful feedback on students’ performance in all assessment tasks
• maintain records of marks awarded to each student for all assessment tasks
• address issues relating to illness, misadventure and malpractice in assessment tasks
• address issues relating to late submission and non-completion of assessment tasks
• advise students in writing if they are not meeting the assessment requirements in a course and indicate what is necessary to enable the students to satisfy the requirements
• inform students about their entitlements to school reviews and appeals to the Board
• conduct school reviews of assessments when requested by students
• ensure that students are aware that they can collect their Rank Order Advice at the end of the external examinations at their school.
12.5 Assessment Components, Weightings and Tasks

Assessment should include a range of tasks.

Preliminary Course

The suggested components, weightings and tasks for the Preliminary course are detailed below:

<table>
<thead>
<tr>
<th>Component</th>
<th>Weighting</th>
<th>Tasks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resource Management</td>
<td>20</td>
<td>Tasks might include:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• exercises using graphs, tables, diagrams, statistics and</td>
</tr>
<tr>
<td></td>
<td></td>
<td>mathematical calculations</td>
</tr>
<tr>
<td>Individuals and Groups</td>
<td>40</td>
<td>• briefing notes</td>
</tr>
<tr>
<td>Families and Communities</td>
<td>40</td>
<td>• case studies from primary or secondary sources</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• interviews and surveys</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• oral presentations</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• examinations (to a maximum of 40% weighting)</td>
</tr>
<tr>
<td>Marks</td>
<td>100</td>
<td></td>
</tr>
</tbody>
</table>

There should be a balance between the assessment of knowledge and understanding outcomes, and course content, and skills outcomes and course content.
HSC Course

The internal assessment mark for Community and Family Studies Stage 6 is to be based on the HSC course only. Final assessment should be based on a range and balance of assessment tasks.

<table>
<thead>
<tr>
<th>Component</th>
<th>Weighting</th>
<th>Tasks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Groups in Context</td>
<td>25</td>
<td>Tasks might include:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• case studies from primary or secondary sources</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• interviews and surveys</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• oral presentations</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• exercises using graphs, tables, diagrams, statistics and</td>
</tr>
<tr>
<td></td>
<td></td>
<td>mathematical calculations</td>
</tr>
<tr>
<td>Parenting and Caring</td>
<td>25</td>
<td>• briefing notes</td>
</tr>
<tr>
<td>Research Methodology</td>
<td>25</td>
<td>• examinations (to a maximum of 40% weighting)</td>
</tr>
<tr>
<td>Family and Societal Interactions</td>
<td>25</td>
<td>• Both the research process and the research project are to be</td>
</tr>
<tr>
<td>OR Social Impact of Technology</td>
<td></td>
<td>included in the assessment</td>
</tr>
<tr>
<td>OR Individuals and Work</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Marks</td>
<td>100</td>
<td></td>
</tr>
</tbody>
</table>

There should be a balance between the assessment of knowledge and understanding outcomes and skills outcomes.

The percentages allocated to each assessment component must be maintained however, the allocations of weightings to the various tasks set for the HSC course is left to the individual schools.

For each component, the assessment should be spread over several tasks throughout the course. Additionally, a single task may be used to assess several components. It is suggested that 3–5 tasks, including the Independent Research Project, are sufficient to assess the HSC course outcomes.
12.6 HSC External Examination Specifications

Time allowed: Three hours (plus five minutes reading time).

Section I Core (75 marks)

Part A (10 marks)
• There will be TEN multiple-choice questions

Part B (15 marks)
• Short-answer questions
• All questions in Parts A and B will be based on the three HSC Core modules:
  – Research methodology
  – Groups in context
  – Parenting and caring.

Part C (50 marks)
• There will be TWO questions: one on each of the HSC core modules:
  – Groups in context
  – Parenting and caring.
• Each question may consist of several parts.
• Both questions will be of equal value.
• Both questions will be compulsory.

Section II Options (25 marks)
• There will be THREE questions: one on each of the three HSC options:
  – Family and societal interactions
  – Social impact of technology
  – Individuals and work.
• Each question may consist of several parts.
• All questions will be of equal value.
• Candidates must attempt ONE question.
### 12.7 Summary of Internal and External Assessment

The following table is a summary of the internal and external HSC course assessment for Community and Family Studies. Schools will note the inclusion of mandatory tasks to ensure that a range and balance of assessment instruments is included in the overall assessment of the course.

<table>

### 12.8 Reporting Student Performance Against Standards

Student performance in an HSC course will be reported against standards on a course report. The course report includes a performance scale for the course describing levels (bands) of achievement, an HSC mark located on the performance scale, an internal assessment mark and an examination mark. It will also show, graphically, the statewide distribution of examination marks of all students in the course.

Each band on the performance scale (except for band 1) includes descriptions that summarise the attainments typically demonstrated in that band.

The distribution of marks will be determined by students’ performances against the standards and not scaled to a predetermined pattern of marks.
13 Glossary

affirmative action  Affirmative action covers any policy that is intended to redress discriminatory practices, especially in regard to employment. The policy is commonly used as a means of redressing gender-based, sexual preference, disability, or racial discrimination. It sometimes involves a form of positive discrimination in favour of a group against whom there has been some discrimination. The principle has been embodied in Australian legislation concerned with human rights and anti-discrimination.

Affirmative action strategies are put in place to provide special help for groups who have been disadvantaged in the past. For example, an employer may run special training or recruitment programs for groups such as Aboriginal and Torres Strait Islander people, women, people with disabilities or people of non-English-speaking background. Such programs help to give these groups (sometimes referred to as target groups) skills and confidence to allow them to compete on equal terms with everyone else.

carer’s leave  Personal/Carer’s leave (or ‘family leave’) is leave taken by an employee to provide care for a sick dependant. This leave was introduced on a general level in NSW by the Industrial Relations Commission in the Personal/Carer’s Leave Test Case that inserted a standard clause in all NSW awards. Employees can take leave to care for a person who is ill and who falls into one of the following groups:

- spouse or de facto spouse or same sex partner;
- child, including adopted, foster, ex-nuptial or step child;
- parent, including a foster parent or legal guardian;
- grandparent, grandchild or sibling;
- children, parents, grandparents, grandchildren, siblings of the employee’s spouse or de facto;
- relative who is a member of their household.

The ill person must be someone for whose care the employee is responsible.

casual employees  Casual employees are those employees engaged to work on an hourly or daily basis for which the employee is paid an extra loading on top of the normal rate to compensate for the lack of the usual benefits such as sick leave and paid public holidays. A casual worker’s employment does not carry with it the guarantee of a full week’s work and is not deemed to have continuity of service with an employer. Each work period is a separate and distinct period of service.
community  ‘all the people living in a specific locality’ (Australian Concise Oxford Dictionary, 1992)

ecological framework  A framework that centres the individual in a series of concentric circles that include family, community and society. The model recognises the bi-directional interrelationships that the individual relies upon in their attempts to achieve wellbeing.

enterprise agreements  An enterprise agreement sets out the minimum conditions of employment of employees engaged in particular types of work, in the same way as an award. However, unlike most awards, enterprise agreements are specific to a particular enterprise or project. Enterprise agreements are negotiated voluntarily between an employer and either the employees concerned or a union on behalf of those employees (the parties).

Equal Employment Opportunity  Equal Employment Opportunity (EEO) means that everyone should have fair and equitable access to jobs, employment conditions, training and promotional opportunities. It does not assume that everyone has the same abilities but aims to ensure that everyone has a fair chance to demonstrate their abilities, to use them, improve them and benefit from them. EEO is consistent with the principle of merit. It means that the best person is chosen for the job, promotion or training opportunity and that they are selected only on criteria that are relevant.

ethics  The rules of conduct recognised in certain patterns of behaviour. The science of human duty in its widest extent including the science of law, whether civil, political or international.

family  ‘two or more people, one of whom is at least 15 years old, related by blood, marriage, adoption or fostering and usually residing in the same place’ (1991 Australian Census)

‘a wider range of relatives by birth or by marriage (whether legal or de facto) who may live in separate households but who are linked by mutual experiences, affection, obligations and exchange’ (Millward 1998 Family Support and Exchange, Family Matters No 50 pp19–23)

Family Adaptation and Adjustment Response (FAAR)  This model was initially developed following observations of families faced with a prolonged war-induced separation. It proposes three stages of adaptation (resistance, restructuring and adaptation) which can be applied to gain an understanding of the resilience of families as they face unpredicted (unplanned) change.
flexible work practices  A flexible work practice is a working arrangement that allows an employee to move from the traditional nine-to-five, five days a week working pattern to a more flexible schedule where the hours and location are more suitable to fit both the employees’ individual circumstances and business requirements. A number of flexible working practices can be offered to help create a balance between career and family responsibilities. Some of these include: part-time work, job sharing, working from home and agreeing to a more flexible approach to working standard hours.

gender construction  In every society, sex differences are given social meanings. Gender refers to social identity which is conferred on the basis of assumed sex and influences how females and males dress, behave and adopt particular roles (Waters and Crook, 1994).

group dynamics  Group dynamics is the study of the structure of social groups and the processes that happen in them. It includes a study of a group’s size, norms, purposes, focus, structure, relationships, patterns of interaction and use of power.

goals  Goals are the aims or ends that individuals or groups wish to achieve. They can be classified as short-term, intermediate or long-term.

long service leave  Long service leave is an entitlement provided under the Long Service Leave Act 1955 (NSW). Full-time, part-time and casual workers in New South Wales are entitled to be paid long service leave after working for an unbroken period of 10 years with an employer. In this Act, a worker is defined as a person who is employed, whether on salary, wages, piecework rates or who is paid wholly or partly by commission.

maternity leave  Maternity leave is a period of unpaid leave not longer than 52 weeks, taken during or after pregnancy. The employee is entitled to return to their previous or an equivalent position upon expiry of the leave. The general maternity leave standards were established by the Australian Industrial Commission in 1979 and then flowed on to federal awards generally. In New South Wales, maternity leave provisions were legislated in 1980.

needs  Needs are the necessities of life that are required for survival, physical health and mental health.
parental leave
Parental leave taken by an employee can be maternity leave, in connection with a pregnancy or the birth of her child; paternity leave, in connection with the birth of his spouse’s child; or adoption leave, in connection with the adoption of a child under five years of age. Parental leave is unpaid leave, unless otherwise specified in an award or agreement. A male or female employee who has completed at least 12 months continuous service with an employer is entitled to parental leave. Continuous service may be on a full-time or part-time basis, but not as a casual.

part-time work
Part-time work involves employees working a regular number of hours each week, but less than the full ordinary working hours for a week prescribed by an award. A part-time employee generally receives all, or most, of the benefits of a full-time employee but on a proportional basis.

paternity leave
Paternity leave is a period of leave that is granted to a male parent for a fixed amount of time upon the birth of a partner's child.

resources
Resources are what are available to individuals, families and groups to achieve goals. They can be classified in different ways.

socialisation
Socialisation is a developmental process by which individuals learn and become aware of the patterns of behaviour expected as a member of society. Through the process, individuals become familiar with the norms and values of the society in which they live.

social group
Social groups are organised and their members share common goals. They have distinctive patterns of interaction that involve interpersonal communication.

sociocultural
Sociocultural involves a combination of both social and cultural factors.

sociogram
Sociogram is a chart that represents personal interrelationships within a group.

standards
Standards are measures of goal achievement, with regard to either quantity, quality or method.

telecommuting
Telecommuting is an off-site work arrangement that permits employees to work in or near their homes for all or part of the work week. Thus they ‘commute’ to work by telephone and other telecommunications equipment rather than by car or transit. Flexible work practice principles and information technology advances mean that telecommuting has become an increasingly popular work practice.

technology
Technology is the know how and creative process that may assist people to utilise tools, resources and systems to solve problems and to enhance control over the natural and made environment in an endeavour to improve the human condition.

‘to utilise tools, resources and systems to solve problems and to enhance control over the natural and made environment in an endeavour to improve the human condition’ (UNESCO, 1985)
‘the means by which humans extend their power over their surroundings’ (Hamilton, 1973)

‘machines, equipment and their productive technique’ (Dictionary of Sociology)

**values**

Values are ideals about which individuals or groups feel strongly; concepts of what is considered desirable. Values give meaning to life as they are what are considered important in life.

**wants**

Wants are preferences or desires that individuals or groups would like to have but are not necessary for survival or to maintain good health.
