

## **2010 CCAFL Filipino Continuers Sample Answers**

This document contains 'sample answers', or, in the case of some questions, 'answers could include'. These are developed by the examination committee for two purposes. The committee does this:

- (a) as part of the development of the examination paper to ensure the questions will effectively assess students' knowledge and skills, and
- (b) in order to provide some advice to the Supervisor of Marking about the nature and scope of the responses expected of students.

The 'sample answers' or similar advice are not intended to be exemplary or even complete answers or responses. As they are part of the examination committee's 'working document', they may contain typographical errors, omissions, or only some of the possible correct answers.

K. Anin is more informal – even using the term “pare” or “mate”. He concedes that patok is small. He justifies prices by saying that wages account for these. He also maintains that because we're in Australia, we should use local ingredients. His tone is positive and full of praise.

Tony gives both a positive and negative opinion on Joel's suitability for the job based on the criteria.
