This document contains the Board of Studies, Teaching and Educational Standards NSW (BOSTES) requirements for assessing and reporting achievement in the Preliminary and HSC courses in Society and Culture for the Higher School Certificate, and provides details of the HSC examination in this course. From time to time changes are made to HSC assessment and examination requirements. Such changes will be made available through updates to this document. Please note that the version on the BOSTES’ website is always the current version.

Requirements for the Personal Interest Project

Assessment in Stage 6

Assessment is the process of gathering information and making judgments about student achievement for a variety of purposes. In the Preliminary and HSC courses those purposes include:

- assisting student learning
- evaluating and improving teaching and learning programs
- providing evidence of satisfactory achievement and completion in the Preliminary course
- providing the Higher School Certificate results.

Assessment for Learning provides a useful approach for the delivery of the Society and Culture Preliminary and HSC courses. It provides opportunities in the context of everyday class activities for students to demonstrate their learning.

The approach is most effective when students:
- are involved in setting learning goals
- know and understand standards and expectations about what is expected and the standard of work
- receive feedback that helps them understand the next steps in their learning and plan how to undertake the next steps.

Reporting achievement at the HSC

The Higher School Certificate credentials received by students are used by the Board to report both the internal and external measures of achievement. Higher School Certificate results in Society and Culture comprise:

- an assessment mark derived from the mark submitted by the school and produced in accordance with the Board’s requirements for the internal assessment program
- an examination mark derived from the HSC external examination
- an HSC mark, which is the average of the assessment mark and the examination mark
- a performance band, determined by the HSC mark.
Student performance in an HSC course is reported against standards on a course report. The course report contains a performance scale for the course describing levels (bands) of achievement, an HSC mark located on the performance scale, an assessment mark and an examination mark. The course report also shows, graphically, the statewide distribution of HSC marks of all students in the course.

The distribution of marks is determined by students’ performances against the standards and not scaled to a predetermined pattern of marks.

The use of both internal assessment and external examinations of student achievement allows measurements and observations to be made at several points and in different ways throughout the HSC course. Taken together, the external examination and internal assessment provide a valid and reliable assessment of the achievement of the knowledge, understanding and skills described for each course.

BOSTES uses a standards-referenced approach to reporting student achievement in the Higher School Certificate. The standards in the HSC are:

- the knowledge, skills and understanding expected to be learnt by students – the syllabus standards
- the levels of achievement of the knowledge, skills and understanding – the performance standards.

Both the syllabus standards and the performance standards are based on the aims, objectives, outcomes and content of the course. Together they specify what is to be learnt and how well it is to be achieved. Teacher understanding of the standards comes from the aims, objectives, outcomes and content in the syllabus together with:

- the performance descriptions that summarise the different levels of performance
- HSC examination papers and marking guidelines
- samples of students’ achievement, collected in the standards packages and published on the BOSTES’ Assessment Resource Centre website.

Internal assessment

This section should be read in conjunction with advice on internal assessment in the Board’s Assessment Certification and Examination (ACE) Manual.

Preliminary course

The suggested components and weightings are designed to give guidance for the school’s assessment of student achievement in the Preliminary course. They may be varied to suit school needs.

HSC course

The Board requires schools to submit an assessment mark for each HSC candidate in Society and Culture. The internal assessment mark submitted by the school provides a summation of each student’s achievements measured at several points throughout the course. The marks submitted for each course group at a school should reflect the rank order of students, and must be on a scale sufficiently wide to reflect adequately the relative differences in student performances.
Internal assessment provides a measure of a student’s achievement based on a wider range of syllabus content and outcomes than may be covered by the external examination alone. The assessment components and weightings to be applied ensure a common focus for internal assessment in the course across schools, while allowing for flexibility in the design of tasks.

A variety of types of task should be used to give students the opportunity to demonstrate outcomes in different ways and to improve the validity and reliability of the assessment.

The standards-referenced approach to assessment for the HSC involves schools ensuring that:
- assessment tasks reflect the weightings and components specified in this document
- tasks are designed to focus on objectives and outcomes
- the types of assessment task are appropriate for the outcomes being assessed
- students are given the opportunity to demonstrate their level of achievement of the outcomes in a range of different task types
- the assessment criteria for each task are such that higher marks are gained by demonstration of better achievement in relation to the syllabus outcomes
- students know the assessment criteria before they begin a task
- marks earned on individual tasks are expressed on a scale sufficiently wide to reflect the relative differences in student performances.

Students should receive meaningful feedback about what they are able to do, and what they need to do in order to improve their level of performance.

The HSC examination

The external HSC examination provides a measure of student achievement in a range of syllabus outcomes that can be reliably measured in an examination setting. The external examination and its marking relate to syllabus standards by:
- providing clear links to syllabus outcomes
- enabling students to demonstrate the levels of achievement outlined in the course performance scale
- applying marking guidelines based on criteria that relate to the quality of the response
- aligning performance in the examination each year to the standards established for the course.

Board requirements for the HSC internal assessment mark

The Board requires that the assessment tasks used to determine the HSC internal assessment mark must comply with the components and weightings specified. The collection of information for the HSC internal assessment mark must not begin before the completion of the Preliminary course.

Schools are required to develop an HSC internal assessment program that:
- specifies the various assessment tasks and the weightings allocated to each task
- provides a schedule of the tasks designed for the whole course.
Note that school-based assessment marks submitted to the Board must NOT include:

- measures of objectives and outcomes that address values and attitudes. (However, as these objectives are important elements of any course, schools may decide to report on them separately to students and parents, perhaps using some form of descriptive statements.)
- measures that reflect student conduct.

See the BOSTES’ ACE Manual for further information.

Assessment components and weightings

**Preliminary course**
The suggested components and weightings for the Preliminary course are set out below.

<table>
<thead>
<tr>
<th>Component</th>
<th>Weighting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Knowledge and understanding of course content</td>
<td>50</td>
</tr>
<tr>
<td>Application and evaluation of social and cultural research methods</td>
<td>30</td>
</tr>
<tr>
<td>Communication of information, ideas and issues in appropriate forms</td>
<td>20</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>100</strong></td>
</tr>
</tbody>
</table>

**HSC course**
The mandatory components and weightings for the HSC course are set out below. The internal assessment mark submitted to the BOSTES is to be based on the HSC course only.

<table>
<thead>
<tr>
<th>Component</th>
<th>Weighting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Knowledge and understanding of course content</td>
<td>50</td>
</tr>
<tr>
<td>Application and evaluation of social and cultural research methods</td>
<td>30</td>
</tr>
<tr>
<td>Communication of information, ideas and issues in appropriate forms</td>
<td>20</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>100</strong></td>
</tr>
</tbody>
</table>

Note: Since the final project will be assessed externally, no part of the product is to be assessed as part of the school assessment program. The Personal Interest Project (PIP) process, however, may be assessed. Students may report in written or oral form on the progress they are making. They may outline their choice of methodologies, justify these and report on their application to the research topic. The student’s PIP diary may provide a basis for assessment.

Teachers may use their discretion in determining the manner in which they allocate tasks within the course content. BOSTES considers that 3 to 5 assessment tasks are sufficient.
Society and Culture HSC examination specifications

The examination will consist of a written paper worth 60 marks and a Personal Interest Project worth 40 marks.

Time allowed: 2 hours plus 5 minutes reading time.

The written paper will consist of TWO sections.

Section I – Core – Social and Cultural Continuity and Change (20 marks)

- There will be objective response questions to the value of 8 marks.
- There will be short-answer questions to the value of 12 marks.

Section II – Depth Studies (40 marks)

- For each of the four (4) Depth Studies there will be 1 question in two unrelated parts worth a total of 20 marks:
  - the first part will be worth 5 marks
  - the second part will be worth 15 marks
- Candidates will be required to answer a question from two (2) Depth Studies
- The expected length of response for each Depth Study will be around six pages (approximately 800 words).

The Personal Interest Project (PIP) requires students to apply appropriate social and cultural research methodologies to investigate a topic related to the course. The completed project will be a substantial piece of research containing a number of components, including a log that outlines the development of the project and the procedures undertaken in researching the topic.

See Requirements for the Personal Interest Project.

Resources and advice

Requirements for the Personal Interest Project

Society and Culture students must each undertake, on an individual basis, a Personal Interest Project worth 40% of the HSC examination mark. The PIP requires students to select a suitable topic related to the course, develop and apply appropriate research methods and submit a completed project containing the required components.

Development of the PIP may commence from the beginning of the HSC course.

Schools must have procedures in place to ensure the effective supervision of the development of students’ PIPs. This is particularly the case where work is done away from school. Schools must be confident that effective supervision and sufficient documentation of this work is possible before giving consent for students to begin work on their PIP.

Each student is to report their progress at three points during the development of the PIP. Both the student and the teacher are to sign these reports. A proforma for the reports is included with this document.

In addition, a brief written record of each student’s progress throughout the project must be kept by the teacher. Teachers may refer to students’ PIP diary and progress reports as well as observations and discussions to maintain the record of student progress. This should not be submitted with the project, but may be requested in exceptional circumstances where the examiners require further information. This record should be retained in the school together with assessment records. A Practical Project: Record of Student’s Progress proforma is available to download from Schools Online.
Students will be required to certify that the PIP is their own original work, and that any material drawn from other sources and any outside assistance is acknowledged. Group projects are not permitted.

Teachers must certify that the work has been completed under their supervision, and that the rules and procedures described here and in the BOSTES’ ACE Manual have been followed.

Principals must be able to endorse the teacher’s declaration that the work:
- has been done under the teacher’s supervision
- is the student’s own work consistent with earlier drafts or any changes as negotiated with the teacher and other examples of the student’s work
- was completed by the due date.

The PIP enables students to demonstrate the development of their interests, research skills and personal experiences concerning the interactions between persons, societies, cultures and environments across time. In particular, students will be able to demonstrate the development and application of social and cultural research methods in completing their PIP.

The Personal Interest Project must:
- be a topic of the student’s own choice
- be related to the course
- develop appropriate methods
- include a cross-cultural perspective
- address continuity and/or change.

The PIP will have a substantial amount of subject matter brought together by the individual student on the basis of their reading, research and personal experience. While the PIP will be the student’s own work, published material should be consulted to provide background material and/or comparative data.

The student should submit a research proposal outlining the topic and its relationship to the course as a whole. Accompanying this research proposal should be an outline of how the topic will be approached, including the research methods to be employed. This outline should be submitted to the teacher before detailed work is begun, so that the teacher may advise on subject matter and research methods. As a result of this feedback from the teacher, the student may need to rethink the topic and/or the approach. A proforma for the proposal is included with this document.

If a student is considering a PIP topic or method of research that might be controversial or possibly unethical, the student should discuss the topic selection with the teacher or the school’s principal.

The student should use a range of research methods that are suited to the topic being studied. These research methods may be those studied during the Preliminary course or those introduced to the student during the HSC core study.
Appropriate methodologies and instruments may be:

- survey
- case study
- participant observation
- content analysis
- focus group
- questionnaire
- interview
- observation
- statistical analysis
- personal reflection
- secondary research

The student should keep a Personal Interest Project diary that will later form the basis of the log. In this diary, the student should record the progress of the PIP, showing a sequential record of the research and details of the processes followed, problems encountered and how these were overcome. This PIP diary will not be submitted with the final PIP, but may be submitted as part of the school-based assessment program.

Presentation of the Personal Interest Project

The PIP should be carefully prepared for submission. It must be word-processed, with the body text in 12 point Times New Roman or Arial, with 1.5 line spacing.

As advised in Official Notice 13/13, the following must be submitted or accessed via Schools Online:
- HSC Society and Culture PIPs must be submitted to the BOSTES electronically
- Schools are also required to electronically certify each student’s PIP
- Instructions on the new process of submitting and certifying HSC Society and Culture PIPs are available under Memos and Documents.

Word limits are indicated for each component of the PIP. The word count is based on all words written, as shown by a computer word count or manual count of each word. In-text referencing or footnotes are NOT included in the word count.

The presented project must contain the following components:

**Introduction**
The introduction requires a brief description (no more than 500 words) of what the topic is about, why this topic was chosen and in what ways it contributes to a better understanding of Society and Culture. The choice of research methods should be explained and justified.

**Log**
The log should be based on the student’s PIP diary and will be a summary (no more than 500 words) of the development of the final product, outlining the procedures undertaken in researching the topic.

**Central material of the PIP**
The central material will be in written form and may be accompanied by photographs, tables, graphs and/or diagrams that should be labelled and incorporated into the text.
through discussion. The central material should be between 2500 and 4000 words. The central material must contain a cross-cultural perspective and address continuity and/or change. The cross-cultural perspective and continuity and/or change should be integrated in the central material of the PIP.

**Conclusion**
The conclusion requires a statement (no more than 500 words) of what the student learnt from the PIP.

**Resource list**
The resource list should include annotated references used in the PIP and/or a list of other kinds of resources, for example films, internet sites or electronic resources referred to during the preparation of the project, and resource persons (e.g. people interviewed). The references should be accurate and include publication/production details. For each internet site, the URL and the most recent date the site was visited should be included, along with a short annotation on its usefulness to the PIP.

**PIP examination criteria**
The following criteria will be used to mark the Personal Interest Project:
- Evidence of achievement of the course outcomes related to the PIP.
- The clarity of the topic, purposes and procedures of the PIP.
- A demonstrated understanding and application of the concepts of the course.
- The appropriate use of research methods essential to the course.
- The accuracy and relevance of the subject matter for the purposes of the PIP.
- A demonstrated knowledge and understanding of viewpoints different from the immediate culture of the student.
- A demonstration of how continuity and/or change have been addressed.
- An integration in a coherent structure of various aspects of the course.
- Conclusions that proceed from the stated introduction and arguments presented in the PIP.
- Evidence that personal experience is related to public knowledge.
- Effective communication of the student’s ideas to a wider audience.
- Evidence of originality of design, analysis and execution.
- Evidence of social and cultural literacy.
- Evidence that sources of information are referenced.

Students should consider the following in the preparation of their Personal Interest Project:

**Clarity**
Is the topic clearly stated? Are the purposes and procedures of the PIP clear?

**Conceptual content**
Does the PIP reflect the concepts of the course?

**Social and Cultural research methods**
Does the PIP demonstrate some of the research methods essential to the Society and Culture course plus any other distinctive procedures? Are the research methods appropriate for the topic? Is there evidence of a systematic approach to the study of the topic? Is there an awareness of both the limitations and the values of the research methods used?
Students should consider the ethical implications of both their topic and the methods they employ to research that topic.

**Subject matter content**
Is the subject matter accurate, relevant to the topic and adequately explained for the purposes of the project?

**Cross-cultural content**
Does the topic reflect some knowledge and understanding of viewpoints different from that of the immediate culture of the student in terms of, for example, socioeconomic group, gender, ethnicity or location?

**Continuity and change**
Does the topic reflect some knowledge and understanding of continuity and/or change, for example viewpoints of different generations, links between the past, the present and the future?

**Integrative skills**
Has the PIP integrated various aspects of Society and Culture? Does the PIP achieve a coherent structure? Do the conclusions proceed from the statements in the introduction and the arguments presented in the central material? Is personal experience related to public knowledge?

**Communication skills**
Is there evidence of social and cultural literacy? Has the student effectively communicated her or his ideas to the external audience?

**Originality**
Does the PIP give evidence of originality in design, analysis and execution?

**Acknowledgement of sources**
Does the PIP acknowledge all sources of information consulted during research?
### Personal Interest Project Research Proposal

To be completed and signed by student and teacher. Original to be kept by teacher as part of Personal Interest Project certification records. Students should receive a copy of the completed form.
