

Question 25 (6 marks)

- (a) Why is it necessary to produce a prototype during the development of a food product? 2

It is absolutely necessary that a prototype is done because if it isn't no one will know if it's good or bad.

- (b) How can food product prototypes be tested? 4

When a company does a prototype test, they call in some members of the public, some workers, the boss or owner and the creator to go to a meeting where they sit and test the ~~company~~ food product and give an evaluation.
