

Question 22 (4 marks)

The flowchart shows a number of processes that are involved in the production of flour from wheat.

- (a) Identify THREE processes from the flowchart in which the raw material, wheat, is transformed into flour. 2

~~check moisture content~~ Grinding the wheat, sifting of the wheat, then testing of the flour.

- (b) Describe ONE process used to transform wheat into flour. 2

Grinding - this process involves breaking the wheat down into a extremely fine substance which is then ~~then~~ called flour.
