

**Question 22** (4 marks)

The flowchart shows a number of processes that are involved in the production of flour from wheat.

- (a) Identify THREE processes from the flowchart in which the raw material, wheat, is transformed into flour. 2

*Check moisture content → Grinding → Sifting*  
*Clean Grain*

- (b) Describe ONE process used to transform wheat into flour. 2

*First you clean your wheat, then when dry you grind it into a powder like substance, then you sift it to get the flour that is made out & then you grind it again until all the wheat is ground into flour.*
