

Start here.

The current impact of emerging technologies is helping operational duties and service delivery in the hospitality industry.

The impact of it is helping businesses be known ~~(to)~~ to everyone and let's the customer know more about the café/restaurant so before going there they have a understanding of the business.

It also helps when just simply ordering you can ~~(copy/paste)~~ order and when sent to a machine so it can print off the order. This is a positive for the ~~(hospitality)~~ hospitality industry because this leaves ~~(the)~~ little room for confusion and problems.

On delivery you can track the person delivering it so you can make sure that it is safe and up to your convenience.

With technology in the ~~(the)~~ hospitality industrial. it helps us and them to work easily and fast so that everything runs smoothly to course.
