2012 HSC - Human Services

Band 1/2

Sample 1 Question 22

describe how each of these three terms client centred care confidentiality and also duty of care apply to the care of a resident in aged care.

client centred care is care that is based on the individual and what they don't like, like ~~like~~ and feel,

for example- John doe is 32 yrs of age he was born 6-1-1980 he has down syndrome which is why his in a nursing home his bed ridden and has a bed bath at the afternoon.

John doe has this care done everytime staff goes to see him and his care will be different to Jane doe.

Confidentiality is that the care and information on the resident stays in the facility and isn't to be talked about by staff.

Duty of care is the care which is needed or must have as it's your duty to do so, things like making a person up, attending to their needs.
