DIRECTIONS TO CANDIDATES

- Only Board-approved calculators are to be used.
- The mark out of 80 will be converted to a mark out of 100.

Section I (30 marks)
- This Section contains 30 multiple-choice questions.
- Attempt ALL questions.
- All questions are of equal value.
- Complete your answers in either blue or black pen on the Answer Sheet provided.
- Allow about one hour for Section I.

Section II (50 marks)
- Attempt ALL questions.
- All questions are of equal value.
- Answer the questions in the spaces provided in this paper.
- Write your Student Number and Centre Number in the spaces provided on the first page of each question.
- Show all necessary working.
- Marks may be deducted for careless or badly arranged work.
- Allow about one hour and a half for Section II.
SECTION I

Attempt ALL questions.

All questions are of equal value.

Instructions for answering multiple-choice questions

- Complete your answers in either blue or black pen.
- Select the alternative A, B, C or D that best answers the question. Fill in the response oval completely.

Sample: \[2 + 4 = \]

\[
\begin{array}{cccc}
\text{A} & \text{B} & \text{C} & \text{D} \\
\bigcirc & \bullet & \bigcirc & \bigcirc \\
\end{array}
\]

If you think you have made a mistake, put a cross through the incorrect answer and fill in the new answer.

\[
\begin{array}{cccc}
\text{A} & \text{B} & \text{C} & \text{D} \\
\bullet & \bigotimes & \bigcirc & \bigcirc \\
\end{array}
\]

If you change your mind and have crossed out what you consider to be the correct answer, then indicate the correct answer by writing the word correct and drawing an arrow as follows.

\[
\begin{array}{cccc}
\text{A} & \text{B} & \text{C} & \text{D} \\
\bigotimes & \bullet & \bigcirc & \bigcirc \\
\end{array}
\]
1 Sue’s VCR uses twenty-four hour time. She wants to record a two-and-a-half hour movie which starts at 10 pm. Which of these settings is correct?

(A) ON at 10:00, OFF at 12:30
(B) ON at 22:00, OFF at 24:30
(C) ON at 22:00, OFF at 00:30
(D) ON at 10:00, OFF at 00:30

2 The floor plans of two bathrooms are shown. George and Sarah wish to buy new fittings for these bathrooms. The cost of fittings is as shown.

<table>
<thead>
<tr>
<th>Bathroom fittings</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toilet</td>
<td>$365</td>
</tr>
<tr>
<td>Bath (rectangular)</td>
<td>$580</td>
</tr>
<tr>
<td>Bath (corner)</td>
<td>$925</td>
</tr>
<tr>
<td>Shower screen</td>
<td>$420</td>
</tr>
<tr>
<td>Vanity (sink) unit</td>
<td>$800</td>
</tr>
</tbody>
</table>

What is the total cost of fittings for these two bathrooms?

(A) $3090  (B) $4255  (C) $4310  (D) $4675

3 David picks a card at random from a deck containing 12 red cards, 10 yellow cards, 5 blue cards and 8 green cards.

What is the probability that he selects a blue card or a red card?

(A) \( \frac{5}{35} \)  (B) \( \frac{12}{35} \)  (C) \( \frac{17}{35} \)  (D) \( \frac{18}{35} \)
Which of the following correctly describes this design?

(A) A hexagon divided into three pentagons.
(B) A hexagon divided into three quadrilaterals.
(C) An octagon divided into three pentagons.
(D) An octagon divided into three quadrilaterals.

During a survey, 1200 people were asked to state the single thing that most concerned them about celebrating New Year's Eve at a public venue. The results of this survey are shown.

<p>| | |</p>
<table>

RHODE ISLAND CHICKEN
Available only in these packs:

- 3 piece pack $3·75
- 5 piece pack $6·00
- 8 piece pack $8·80

Emily wants to buy exactly 18 pieces of chicken.

What is the lowest amount she can pay for 18 pieces of chicken?

(A) $19·80  
(B) $20·80  
(C) $21·75  
(D) $22·50
During a holiday in Queensland, John and Francesca take this Three Island Cruise.

How much time during the trip is spent travelling from one place to the next?

(A) 1 hour 45 minutes   (B) 2 hours 30 minutes
(C) 6 hours 5 minutes    (D) 8 hours 35 minutes

What percentage of the world’s coffee is produced in North America?

(A) 20%   (B) 25%   (C) 30%   (D) 72%

The retail price of a washing machine is $990. A store discounts the retail price by 10% and charges a $20 delivery fee.

How much does it cost to buy the washing machine from the store and have it delivered?

(A) $871   (B) $911   (C) $1069   (D) $1109
USE THE FOLLOWING MAP TO ANSWER QUESTIONS 18 AND 19.

18  What is the position of Norrköping on the map?
    (A) 58.5°S 16°W  (B) 58.5°S 16°E  (C) 58.5°N 16°W  (D) 58.5°N 16°E

19  What is the approximate distance (in a straight line) from Stockholm to Norrköping?
    (A) 50 km  (B) 130 km  (C) 200 km  (D) 300 km
A radio station charges its sponsors $1500 for each 30 seconds of advertising.

Between 8 am and 9 am one morning, the radio station collected $36,000 in advertising fees.

What percentage of that hour was allocated to advertising?

(A) 12%  (B) 20%  (C) 24%  (D) 40%

If calls to the UK are not included in the above comparison, which company offers the best deal?

(A) One.Talk  (B) STARTEL

(C) APTA  (D) Octopus
22. The daily interest rate for the outstanding balance on a credit card was 0.037%. The interest charged for 29 days was $9.12.

How much was the outstanding balance (to the nearest dollar)?

(A) $71  (B) $246  (C) $850  (D) $24,649

23. This logo is based on a square and semicircles.

Which of the following combinations of shapes has an area equal to the area of the logo?

(A)  
(B)  
(C)  
(D)  

24. Laurie and Heather’s pool is in the shape of a rectangular prism. Find the cost of re-tiling the interior of the pool if the tiler charges $34 per square metre.

(A) $1132.80  (B) $2142  (C) $2862.80  (D) $4392.80
Ingrid’s flight from Sydney to Stockholm will take thirty-six hours. Her plane leaves Sydney at 5 pm on Sunday night. Local time in Stockholm is ten hours behind local time in Sydney.

What will the time be in Stockholm when Ingrid lands there?

(A) 7 pm Monday  (B) 2 am Tuesday
(C) 5 am Tuesday  (D) 3 pm Tuesday

Zoran returned to Sydney from an overseas holiday with 50 French francs and 20 UK pounds, and converted this money to Australian dollars. Exchange rates are given in the table.

How many Australian dollars did Zoran receive?

(A) $20·49  (B) $65·52  (C) $201·60  (D) $246·63

<table>

28 In 1999, 80 000 litres of oil were spilled on Sydney Harbour. In order to illustrate the amount of oil spilled, a Sydney newspaper published the following graphic.

Assume that both the backyard pools illustrated have the same constant depth.

What is the depth of the pool? (1 m³ = 1000 L)

- (A) 0.44 m
- (B) 0.67 m
- (C) 1 m
- (D) 1.5 m

29 At the end of 1999, Cynthia bought a house for $350 000.

During the year 2000, Cynthia’s house increased in value by 4%. It is predicted that the value of the house will fall by 1% during 2001.

If this prediction is correct, what will be the value of Cynthia’s house at the end of 2001?

- (A) $339 500
- (B) $360 360
- (C) $360 500
- (D) $367 640

</table>

(i) Calculate the cost of building a four-bedroom house with a rear rumpus, double garage and the cheapest Federation facade.

..................................................................................................................................
..................................................................................................................................
..................................................................................................................................
..................................................................................................................................

(ii) What is the percentage discount offered on the three-bedroom ensuite with single garage and classic facade?

..................................................................................................................................
..................................................................................................................................
..................................................................................................................................
..................................................................................................................................

Question 33 continues on page 26
QUESTION 33 (Continued)

(b) Below is the ground floor plan of a house.

(i) What is the perimeter of the games room?
........................................................................................................................................

(ii) The window of the dining room faces south.

In which direction does the window in the study face?
........................................................................................................................................

(iii) The garage floor is to be tiled.

Each tile is 50 cm by 50 cm.

1 How many tiles are needed to cover the garage floor?
........................................................................................................................................

2 The tiles are supplied in boxes of 30. Only full boxes can be purchased.

How many boxes need to be purchased to tile the garage floor?
........................................................................................................................................
QUESTION 33 (Continued)

(c) This is a scale drawing of the floor plan of a house.

(i) What is the scale used?
.................................................................................................................................

(ii) What is the floor area of the house?
.................................................................................................................................
.................................................................................................................................

(iii) The house is to be built on a concrete slab which is 350 mm thick.

Find the volume of concrete in the slab. Give your answer in cubic metres.
.................................................................................................................................
.................................................................................................................................

Question 33 continues on page 28
QUESTION 33 (Continued)

(d) A real-estate agent charges the following fees for selling a property.

<table>
<thead>
<tr>
<th>Sale Value of Property</th>
<th>Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to and including $50,000</td>
<td>5%</td>

Question 34 continues on page 30
This pattern was constructed using tiles of four different geometric shapes. Squares and isosceles triangles are two of the shapes.

Name the other two shapes.

.................................................................. ............................................................. ..

(d) This design uses five identical semicircles.

Use your compasses to enlarge this design in the space below, so that its length is 15 cm.

A

B
QUESTION 34 (Continued)

(e) Classi chocolate balls, each with a diameter of 3 cm, are packed into a triangular prism. The base of the prism is an equilateral triangle.

(i) Part of the pattern for the first layer of chocolate balls is shown.

![Diagram of chocolate balls in a triangular prism]

Complete the pattern for the first layer on the diagram above.

(ii) The height of the prism is 24 cm.

![Diagram of chocolate balls in a triangular prism with height indication]

If the number of chocolates in each layer is the same, how many chocolate balls fill the prism?

Question 34 continues on page 32
QUESTION 34 (Continued)

(f) The cardboard separator illustrated is placed inside the box to protect bottles. It fits exactly inside the box.

(i) If only one bottle fits in each separate section, how many bottles will fit into the box?

.................................................................................................................................................................

(ii) Find the total area of cardboard needed to make the separator.

.................................................................................................................................................................
.................................................................................................................................................................
(i) Pollution levels are said to be HIGH when the index is 50 or higher, and MEDIUM when the index is greater than or equal to 25, and less than 50.

For the South-west Sydney region, what percentage of the daily readings are in the MEDIUM range?

(ii) Calculate the value of the pollution index for East Sydney on 6 January.

Question 35 continues on page 34
QUESTION 35 (Continued)

(b) In a recent election the following primary votes were recorded.

<table>
<thead>
<tr>
<th>Candidate</th>
<th>Number of votes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Smith</td>
<td>95 700</td>
</tr>
<tr>
<td>Jones</td>
<td>29 940</td>
</tr>
<tr>
<td>Yuen</td>
<td>123 860</td>
</tr>
</tbody>
</table>

(i) A television reporter said: ‘Jones received 12% of the votes. This means that one person in twelve voted for Jones.’

Was the reporter correct? Give reasons for your answer.

.................................................................................................................................
.................................................................................................................................
.................................................................................................................................

(ii) The voting system was preferential.

Twenty per cent of Jones’ votes went to Yuen and the rest went to Smith. Complete the following table to show the number of votes for Smith and Yuen after preferences were distributed.

<table>
<thead>
<tr>
<th>Smith</th>
<th>Yuen</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
QUESTION 35  (Continued)

(c) (i) The table shows estimates of land use in Indonesia in 1993.

<table>
<thead>
<tr>
<th>Land use</th>
<th>Percentage of land</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arable land</td>
<td>10%</td>
</tr>
<tr>
<td>Crops</td>
<td>8%</td>
</tr>
<tr>
<td>Pastures</td>
<td>8%</td>
</tr>
<tr>
<td>Forests</td>
<td>60%</td>
</tr>
<tr>
<td>Other</td>
<td>14%</td>
</tr>
</tbody>
</table>

Complete the divided bar chart below to show this information.

(ii) By the end of 1999 the estimate for the percentage of forests in Indonesia had decreased to 41%, due to deforestation. There are 1 826 440 km² of land in Indonesia.

What was the estimated area of forests in Indonesia at the end of 1999?
Give your answer in hectares. (1 km² = 100 ha)

.................................................................................................................................
.................................................................................................................................

(iii) The ‘forest-to-people index’ is the number of hectares of forests per person. In 1999, the population in Indonesia was 216 108 300. Use your answer to part (ii) to find the forest-to-people index at the end of 1999. (Give your answer correct to two decimal places.)

.................................................................................................................................

(iv) It is estimated that 1·5 million hectares of forests are destroyed in Indonesia each year, and that the population is growing at 1·46% per year. Assume that these estimates are correct in 2000 and 2001.

1 What will be the population in Indonesia at the end of 2001?

.................................................................................................................................
.................................................................................................................................

2 What will be the forest-to-people index at the end of 2001?

.................................................................................................................................
.................................................................................................................................
.................................................................................................................................
