2012 HSC - Aboriginal Studies

Band 1/2

Sample 1 Question 13(a)

Educational outcomes within Australia for Aboriginal  
~~are~~ have lower ~~average~~ standards as if you was  
to compare Non-Indigenous Education is on a higher  
level. With saying this in different countries comes  
different chart levels in education. To say if within  
Australia the difference and the gap between the two  
was 30% in saying Non-Aboriginal people had  
30% more educational learning and in other countries  
as in ~~the~~ ~~White~~ America, and other countries could  
have a difference of 40% maybe 20%

Aboriginal learning is very poor compared to non-indigenous  
people within Australia and around the world and some  
schools treat Aboriginal people unequal and some most  
students leave school and does not get a job as  
soon as they finish school

Start here.

Some strategies that the government have introduced into the school have been a huge improvement within schools.

Schools within Australia and around the world have hired Aboriginal local elders that have been educated to come and work in the schools to help indigenous people children in private, primary and high schools and since there is trust and motivation there for the children to stay in school and finish year 12.

International indigenous the government throughout the world have introduced <sup>strategies</sup> ~~strategies~~ for Aboriginal children to stay in school and this was if they was to go to school stay in school, learn and finish school with being educated in the end of finishing school that they could be going some where great and a new improved generation of Aboriginal people will be improved.
