## EDUCATION.

2012 HSC - Aboriginal Studies

Band 2/3

Sample 3 Question 13(a)

Indigenous education has improved drastically over the years by the help of governments, schools and the Aboriginal students.

By the government offering scholarships to Indigenous students this puts a reason on the table for the children to attend school and further their education. Also having extra help provided such as tutoring for them adds to the cause.

The COAG has made targets to keep the education ~~set~~ status rising by the use of the "Closing the Gap" program which is having ~~a~~ great progress.

More Indigenous students are staying in school longer and ~~want~~ wanting to get a higher education to better themselves. Attendance rates are higher also.

Universities are even having their own Indigenous based sections such as

the Barrain Section at the Newcastle University.

So more and more opportunities are being presented for Indigenous students.
