

Use the information provided to answer Questions 3–4.

- 4    What common experiences of Indigenous people help to explain the income levels shown in the graph?    3

The difference between the Non-Indigenous and Indigenous population when it comes to income has always been evident.

This is due to the racial discrimination that was both indirectly and directly put in place to prevent the Indigenous from getting employed. An example of each include; indirect- being that the employee must have white skin whereas direct would be a company straight out saying no to Indigenous people. Another factor that explains the difference is the lack of education received by the Indigenous people making it harder for them to get jobs.
