

Use the information provided to answer Questions 3–4.

- 4 What common experiences of Indigenous people help to explain the income levels shown in the graph?

3

The graph tells us that Australia needs more funding on educating indigenous people so they can get better paying jobs. Indigenous people drop out of school early with no skills or education and therefore cannot get a well paying job. The education system does not include students making it boring, they also find it hard to understand therefore they drop out because its too hard.
