

Question 27 (7 marks)

Evaluate an Integrated Pest Management (IPM) program for a named pest or disease of an animal host you have studied. In your answer, include examples of management strategies used in this program.

7

An IPM program for a pest on sheep for example would be checking the sheep moving them to different pastures every three months so the grass can grow back and to prevent the sheep from catching a disease. Give the sheep the proper injections to prevent diseases when they need it. Make sure that their nails are clipped. Make sure lambs are given the correct shots on time.
