

Question 28 (10 marks)

- (a) Explain a strategy that farmers use to manage the sustainability of water resources for agricultural production. **3**

A strategy that farmers use to manage the sustainability is to have a rain water tank and a solar heating system.

Question 28 continues on page 22

Question 28 (continued)

- (b) For a soil degradation problem, explain farm management practices that have contributed to the problem and a procedure that can be used to alleviate the problem.

7

A farm management practice that has contributed to the ~~prob~~ stopping of the problem would be the rotation of animals in different pastures every 3 months or so.

Farmers move their cattle to different pastures to allow the soil to get better and the grass to grow again this allows the farmers to have a constant fresh supply of grass for their cattle
