

Question 28 (10 marks)

- (a) Explain a strategy that farmers use to manage the sustainability of water resources for agricultural production. **3**

* They use rainwater tanks.
* They use underground rivers.
* They may also live high up in the mountains where it would rain more.

Question 28 continues on page 22

Question 28 (continued)

- (b) For a soil degradation problem, explain farm management practices that have contributed to the problem and a procedure that can be used to alleviate the problem.

7

Some practices are plowing ^{the} ~~the~~ soil which loosens the topsoil ~~etc~~ which gets blown away or washed away from rain into rivers.

we could stop plowing the land with machines & use other means to loosen the soil enough for your crops.
