Question (a)

Designer looks whether the existing product is
usefull so they can change the product foo
~~further~~ further development. Designer checs
if the products will succeed ~~so~~ in the future

the should ~~not~~ undertake the safety and
for the environmently and friendly of an existing
product before ~~they~~ design it or make it.
But the big concerns ~~for the~~ designer should undertake
if the ~~pro~~ products is usefull and maintain resources
for future use.

Question. (B)
Because it is necessary to ~~fot~~ further develop an
existing product ~~so~~ for the society or environment.
maybe the ~~model~~ current model is not suitable
~~As~~ As existing ~~products~~ once. So it is very necessary
to chang the existing product an develope into
different ~~technical and~~ new ~~product~~ product and
with different unique futures. Designers see if
the existing product not same the current one
so they can develope changes into the product.
