

## HOW AND WHAT IS TO BE INVESTIGATED?

My major project will have many areas that need to be investigated. These will include:

- ❖ What soil they will grow in?
- ❖ What amount of light they need to grow?
- ❖ What position do they like? Eg. - (Do they prefer all sun, all shade, or both)
- ❖ If they can be grown inside?
- ❖ How long they take to grow to reach full maturity?

To answer these questions I will use:

- ❖ Books about herbs from the library and garden books about herbs.
- ❖ Go to the nursery and ask questions
- ❖ Some herbs at nurseries have information on the back of the tags, which I will also use.
- ❖ Watch Television shows like *Burkes Backyard*, *Back yard Blitz*, and *Ground force* as they may include segments in their show about different herbs.

More areas that need to be investigated are:

- ❖ What type of clay will be used?
- ❖ What size are the pots?
- ❖ What materials will be used?
- ❖ What colours will be used to decorate it?
- ❖ What will be used for making the pots waterproof?
- ❖ What will be used to show what the names of different herbs are?
- ❖ How many herbs can fit in one pot?

These can be answered if I investigate at the:  
Library- Look for books that have creative way  
for decorating

- Books on how and what can be used to waterproof.
- Watching television shows- Burkes Backyard, Backyard Blitz and Ground force.
- Testing and experimenting- Help me chose the to be appropriate way for my project to be successful.
