

**Question 21** (10 marks)

- (a) A highway currently passes through a country town. The government is proposing to build a bypass that diverts highway traffic away from the town.

4

Discuss the costs and benefits of this proposal.

The costs and benefits of this highway, can lead to many various issues. If the government is proposing to build a bypass, the cost of this project will rise. Any structural developments are costly. However they can also give out many benefits for ~~the~~ ~~many~~ many people who to work and gets ~~had~~ held up by the traffic. This is why the government spendings towards the environment and structural change.

**Question 21 continues on page 11**

Do NOT write in this area.

- (b) Explain the effect that globalisation has had on environmental sustainability.

There are many effects that globalisation has on environmental sustainability. If globalisation increases, this could affect the environment ~~and~~ by the many plants, trees, ~~and~~ environment can get destroyed because globalisation can remove many ~~and~~ environmental features, such as parks. When ~~global~~ population increases in the economy, they tend to find ways where they can maintain environment, as population grows they need to sustain, the economies structure. Many environmental ~~and~~ features can be destroyed during this time. Also an increase in cost will affect globalisation because of the expenses that will be spent during the maintenance of the environment structure.
