

**Question 22** (4 marks)

The flowchart shows a number of processes that are involved in the production of flour from wheat.

- (a) Identify THREE processes from the flowchart in which the raw material, wheat, is transformed into flour. 2

Sifting → test flour for dough strength, moisture and protein content → storage.

- (b) Describe ONE process used to transform wheat into flour. 2

Sifting - by this, flour and the other product are mixed, so it used to transform
