

Question 22 (4 marks)

The flowchart shows a number of processes that are involved in the production of flour from wheat.

- (a) Identify THREE processes from the flowchart in which the raw material, wheat, is transformed into flour. 2

Wheat at the farm, Grinding and Sifting

- (b) Describe ONE process used to transform wheat into flour. 2

Storage because it keeps it at the right ~~temp~~ degrees to keep it cool so it stays like flour.
