

Question 22 (4 marks)

The flowchart shows a number of processes that are involved in the production of flour from wheat.

- (a) Identify THREE processes from the flowchart in which the raw material, wheat, is transformed into flour. 2

1. wheat at farm, transport to mill &
3. Grinding

- (b) Describe ONE process used to transform wheat into flour. 2

They get the wheat and they grind it so it is not as clumpy so it is easier for them to turn it into flour.
