

Question 25 (6 marks)

- (a) Why is it necessary to produce a prototype during the development of a food product? 2

it is necessary to produce a prototype during the development of the product, so that they can see if any future needs to be changed.

- (b) How can food product prototypes be tested? 4

Food product prototypes can be tested by a whole bunch of people having a taste test of the foods, and they can then see if there is anything that needs to be changed around in the food product.
