

Question 25 (6 marks)

- (a) Why is it necessary to produce a prototype during the development of a food product? 2

it is important to produce a prototype during the development of food so you and your staff know what your doing and it guide to right to the end.

- (b) How can food product prototypes be tested? 4

The prototypes can be tested by you starting out with a small amount and see if it works. If so then you do a bigger batch and follow through with it and that's how you will test it.
