

Question 22 (4 marks)

The flowchart shows a number of processes that are involved in the production of flour from wheat.

- (a) Identify THREE processes from the flowchart in which the raw material, wheat, is transformed into flour. 2

Conditioning the grain, grinding and sifting are all operations that transformed wheat into flour.

- (b) Describe ONE process used to transform wheat into flour. 2

The process of grinding wheat into flour is by obtaining wheat into a large steel bowl, followed by the crushing resistance of rollers that grind the wheat into flour or a fine powdery substance.
