

Question 22 (4 marks)

The flowchart shows a number of processes that are involved in the production of flour from wheat.

- (a) Identify THREE processes from the flowchart in which the raw material, wheat, is transformed into flour. 2

Grinding, -Sifting, Storage, Conditioning
(operation, storage)

- (b) Describe ONE process used to transform wheat into flour. 2

Grinding the wheat. The wheat must be grinded down to a very fine rate. The grinding can take place by using a roller grinder, which grinds the wheat into a fine powder, flour.
