

Start here.

a. Some affects could be, the pollution factor, are they able to expand is the land no inhabited by animals and some others

b. in relocating there is things like, can you find a place that is big enough to support what you want to do, can you afford that place is it able to attract attention so will you receive ~~that~~ them customers still and are you to far from any town or is it populated enough and do they want your product, then other things like will your suppliers still supply you, other things say if you do move far away from your original store and you are gonna lose your employees will you be able to rehire you people or is there not enough or working people in that town, and if in a little town how get your product out will people still come to buy your product.

TECHNICAL: will new machines and equipment have to be bought if so will it increase sales will it put people out of a job or will new equipment mean more ~~money~~ training on the staff can the staff keep up with the new more technical gear. ~~and will saving help in any~~
