Question 11 (1 mark)

How could a .wav file be optimised for use on the web? **1**

WAV files are more suitable for video
on the web, because of its small size

Question 12 (2 marks)

Compare downloading and streaming video. **2**

The main issue relating to internet video is download time
If a video is being Streamed it can be viewed
quicker, but it looses the ability to play back,
This is were downloading a video is more
efficient. Once the down load is compleate
the user is able to playback at will.

Question 13 (2 marks)

What are the advantages of using cascading style sheets when developing websites?   2

it makes it easyer for the developer to design the web site. Showing an almost time line approach to the development can improve the flow of the website by making it functional, by allowing the developer to review and compare each web page.

Question 14 (3 marks)

* lossless -
this is done by removing the unwanted sections of data, this make the file smaller with out loosing to much redundant data.

*

Question 15 (3 marks)

Discuss the suitability of using vector and bitmapped images in a multimedia presentation.   3

bitmaped image's are perticuslarry good for Shawing the hole image, while vector is suitabally for zooming in on images, with out loosing any detail. bitmapped images offer more colours and better sharpness in the images.
vector bassed images are smother in apperence.
These two types of Files are ethiealy better in terms of presentation, as the are both easy on the eyes

Question 16 (4 marks)

Describe the procedures that need to be followed by a web designer when constructing 4
a website.

* Story boarding is the First steep when
designing a web page, in this stage the
developer will determine how big his web site
will be, by the number of pages it has.
* implementation is the next steep in this
stage the developer will start to design
his web page's, either by making one by
one of using templates.
* first the developer will now start to
populate his web pages with data.
this involves uploading videos, audio and images.
to the web pages.
* the last steep is to test the hyper links
and then launch the web site.
