

### Evaluation

The chest that I made achieved its purpose that I accepted it to and more. The production of the product was very fast and I was very surprised how fast I made the chest. I would recommend it to anyone, as it is simple and fast to make. I had a feeling that I would change the measurements but all went well and no measurements were changed. The final look of the product was the look I wanted, but when I stained it I was unhappy with the colour. I decided to stain it new golden oak, but it turned out an orange colour, which was very unsatisfying. The size of the chest was not as large as I wanted it to be, I would like it much higher, as it appears to small but is quite large inside.
