

HSC 2002 – Industrial Technology

Evidence of Solutions to Problems in Production

Band 4/5

Demonstrates how solutions to some problems in major project production were addressed.

Here I used the offsets from the merrle to join the Silver Ash leg in place. I had to cut a template for this process and use it as a mould for the sash clamp to hold it in place.

This photograph displays the chair together. The threaded rods keep it in place. This is a check to see if the chair fits together before I put the nitrocellulose lacquer.
