

# PRODUCTION

## Distinguishing features of a Band 1/2 Project

- Projects display a low degree of difficulty and construction skills. Skills demonstrated are often simple and repetitive.
- Industrial processes, when used, are low range. Many processes used are simple and hand-tool-based.
- Problem solving is non-existent. Project may look complete yet doesn't function correctly, eg drawers that won't slide, doors that catch on the floor or aren't aligned correctly.
- Finish is very poor and amateurish.
